Boston Society of Natural History
VII.

FAUNA OF NEW ENGLAND.

11.

LIST OF THE AVES.

By GLOVER M. ALLEN.

BOSTON:
PRINTED FOR THE SOCIETY FROM THE
GURDON SALTONSTALL FUND.
JUNE, 1909.
FAUNA OF NEW ENGLAND.

The Library and Publishing Committee will issue, as volume seven of the Occasional Papers, a Catalogue of the animals of New England.

Parts will be published at irregular intervals, and though the details of the several lists will vary somewhat in the different groups, each list will include, 1st, the accepted name (scientific and vernacular); 2d, reference to the original description, with record of locality; 3d, reference to an authentic description and illustration, and 4th, habitat and occurrence.

The Committee considers these lists a necessary preliminary to a series of comprehensive, illustrated monographs, the publication of which it is hoped the Society will at some later time take upon itself.

The Committee also believes that these lists will aid in the accumulation of valuable material for the New England collection of the Society. With this in view a separate check list of names will be issued with each part. In this check list the + indicates a specimen in the Society's Museum; the — that a trustworthy record exists.

Toward the accomplishment of its aims the Committee invites the cooperation of all interested in the Fauna of New England.

Communications concerning specimens should be addressed to the CURATOR of the Society (Chas. W. Johnson), notes and records of occurrence to the EDITOR of the "Fauna of New England" (Samuel Henshaw).

Boston Society Natural History,
234 Berkeley St., Boston, Mass.
AVES.

The following list aims to include all species of birds known to have occurred in New England within historic times. Those only whose occurrence is believed to be natural are given a serial number, while introduced, escaped, or hypothetical species are given in a separate list. The nomenclature is that adopted by the American ornithologists' union, including the changes of the 14th supplement to the Check-List, July, 1908. Of the vernacular names, the first given is in each case that of the Check-List, and those following are local names current for the most part in New England. Unless otherwise stated, the term "migrant" means that the species occurs in both the spring and the fall migrations; "summer resident" implies that the species breeds; "resident," that individual birds remain the entire year in the State. The migration and nesting dates given, are almost wholly those available from published sources and are hence in many cases, somewhat meager. Unusual dates are enclosed within parentheses. If the records for the presence of a given species within any State do not exceed three, the place and date of each are given if known.

For brevity of citation, references to figures of eggs in the works of Bendire, Capen, and Seebohm are given by the name of the author followed by the date, plate, and figure. The titles of these works follow:

Seebohm, Henry. Coloured figures of the eggs of British birds, with descriptive notices. Sheffield, xxiv+304 pp., pls.

AVES.

PYGOPODES.

COLUMBIDAE.

1. **Columbus holboelli** (Reinhardt) Ridgway.

**Holboell's grebe; Red-necked grebe.**

Fresh and salt water; nests among rushes in sloughs.

ME.—Uncommon winter resident coastwise. Sept.—April 24.

N. H.—Uncommon migrant and coastwise winter resident. Oct.—May (June).

VT.—Rare migrant: Middlebury; Wells River; Windsor, spring.

MASS.—Uncommon migrant and winter resident, mainly coastwise. (Sept.) Oct. 10—May 24.

Conn.—Uncommon winter resident coastwise. Oct. 19—spring.

2. **Columbus auritus** Linné.

**Horned grebe; Devil diver; Hell diver; Little diver; Tinker; Tinker loon.**

Salt and fresh water; nests among rushes in marshes.
P | PYGOPODES.  
---|---
   | COLYMBIIDAE.
Me.— Common migrant, mainly coastwise; rare winter, and in northeastern part, rare summer resident.
Vt.— Rare migrant.
Mass.— Common migrant and winter resident, mainly coastwise. Oct. 1—May 6 (June 1, Springfield).
Conn.— Common winter resident coastwise; accidental in summer (Melrose, July 26, 1882). Sept.—May (July 26).

3. Podilymbus podiceps (Linne) Lawrence.

Pied-billed grebe; Dabchick; Devil diver; Diedapper; Dipper; Frog-in-throat; Hell diver; Water witch.

Chapman, Handb. birds east. No. Amer., 1895, p. 57; Bird-life, 1898, pl. 2. Egg, Capen, 1886, pl. 24, fig. 5.

Freshwater rivers, ponds, swamps; nests among reeds in swamps.

Me.— Common migrant, mainly coastwise; less common summer resident. April—May 19; summer; Sept. 1—Nov. 13 (late Nov.). Eggs, June 6.
Vt.— Rare summer resident. Spring—Oct. 19.
Mass.— Rare spring, common fall migrant, and uncommon local summer resident; accidental in winter. (Feb.) Mar. 1—Dec. 10. Eggs, April 23—June 28.
Conn.— Common migrant, mainly in fall, and rare summer resident. April—summer; Sept.—Nov. (Dec. 25, 1908, South Norwalk).

Loon; Big loon; Call-up-a-storm; Great northern diver.

Urinator imber (Gunnerus). Chapman, Handb. birds east. No. Amer., 1895, p. 58; Bird-life, 1898, pl. 3. Egg, Capen, 1886, pl. 24, fig. 2.

Salt and fresh water; nests on shores of lakes.

Me., N. H.—Common migrant, less common winter and summer resident. Eggs, June 11–19 (July).

Vt.—Uncommon summer resident.

Mass.—Common migrant and winter resident, mainly coastwise; rare summer resident inland (formerly Springfield); a few non-breeding birds summer offshore.

R. I.—Common migrant and winter resident coastwise; a few non-breeding birds summer offshore. Sept. 15–May 28; summer.

Conn.—Common winter resident coastwise; formerly a rare summer resident (Easthampton). Oct.–April 29.

5. Gavia arctica (Linne) Allen.

Black-throated loon or diver.

Seacoasts; nests on the ground.

Me.—Rare winter visitor: China, Kennebec Co., April 19, 1899; Cutler, Dec. 8, 1881.

Mass.—Doubtfully recorded.

Conn.—Doubtfully recorded (? near Southbridge, Mass.).

   - Red-throated loon; Cape-race; Little loon; Red-throated diver; Scape-grace.

   *Colymbus stellatus* Pontopp., Danske atlas, 1763, vol. 1, p. 621. (Based on Willughby.)

   Salt water mainly, sometimes on lakes; nests on the ground.

   Vt.—Rare migrant. Nov. 1.

   Mass.—Uncommon spring, common fall migrant and winter resident, mainly coastwise; casual in summer. Aug. 27–April 8 (July 2).

   R. I.—Common migrant and winter resident coastwise; a few non-breeding birds summer offshore. Oct. 1–April 27 (summer).

   Conn.—Common winter resident, coastwise. Oct.–May.

**ALCIDAE.**

7. **Lunda cirrhata** (Pallas) Pallas.

   - Tufted puffin.

   *Alea cirrhata* Pallas, Spic. zool., 1769, fasc. 5, p. 7, pl. 1; pl. 2, figs. 1–3. “In Mari inter Kamtschatkam et Americam Archipelagumque Kurilum.”

   Rocky sea coasts; nests in burrows.

   Me.—Accidental visitor: mouth of Kennebec River, winter of 1831–32.
8. **Fratercula arctica** (Linné) Schäffer.

**Puffin; Paroquett; Sea parrot.**

Rocky seacoasts; nests in burrows.

Me.—Common winter resident coastwise, and rare summer resident (Matinicus Rock and Machias Seal Island).

N. H.—Uncommon winter visitor (at Isles of Shoals).

R. I.—Doubtfully reported.

9. **Cepphus grylle** (Linné) Brehm.

**Black guillemot; Pigeon murre; Sea pigeon.**

Rocky seacoasts; nests in deep crevices of rocks.

Me.—Common winter resident coastwise; less common summer resident from Knox Co. eastward. Eggs, June 15–23.

N. H.—Uncommon winter visitor coastwise.

Mass.—Uncommon winter visitor coastwise. Sept.–April 19 (May).

R. I.—Rare winter visitor. Nov. 18–April.

Conn.—Rare winter visitor coastwise: Stony Creek, Dec., 1887.
PYGOPODES.

ALCIDAE.

10. **Uria troile** (Linné) Latham.

*Murre; Foolish guillemot; Guillemot.*

Coues, Key No. Amer. birds, ed. 5, 1903, vol. 2, p. 1082, figs. 742, 743.

*Alca troile* (Linné). Dresser, Birds of Europe, 1871-81, vol. 8, pl. [621]. Egg, Capen, 1886, pl. 24, fig. 9; pl. 25, fig. 1-3.

Rocky seacoasts; nests on sea cliffs.

Me.— Rare winter visitor: Eastport, Dec. 27, 1886; Scarborough.

Vt.— Doubtfully recorded.

Mass.— Rare winter visitor: "Massachusetts" (Society collection).

R. I.— Doubtfully recorded.

Conn.— ? Rare winter visitor (Merriam, probably in error for *U. lomvia*).

11. **Uria lomvia** (Linné) Bryant.

*Brünnich's murre; Brünnich's guillemot; Ice-bird; Large-billed guillemot; Sea crow.*

Rocky seacoasts; nests on sea cliffs.

Me.— Common winter visitor coastwise, casual inland; a doubtful breeding record (Penobscot Bay, M. Hardy). Nov. 23–Mar.

ALCIDAE.

Vt.—Irregular winter visitor. Nov.—Jan.
Conn.—Irregular winter visitor, sometimes common. Nov. 18—Feb. 16.

12. **Alca torda** Linné.

**Razor-billed auk; Razor-bill; Tinker murre; Turre.**

Rocky seacoasts; nests in rock crevices.

Me.—Common winter visitor coastwise; said to have nested formerly.

Mass.—Uncommon winter visitor coastwise. Nov. 1—April 15.
R. I.—Rare winter visitor coastwise. Nov. 15—Feb. 4.
Conn.—Rare winter visitor coastwise.

13. **Plautus impennis** (Linné) Steenstrup.

**Great auk; Garefowl.**

Formerly a coastwise species, breeding at Funk Id., near Newfoundland, and at a few places on the European coast; last specimen killed in 1844.
ME., N. H., Mass.—Formerly a winter visitor coastwise.
R. I., Conn.—Probably occurred formerly as a winter visitor coastwise (bones in shell heaps at Block Id., R. I.).

Dovekie; Ice-bird; Knotty; Little auk; Pine-knotty; Rotche; Sea dove.

Rocky coasts; nests on ledges or in crevices of sea cliffs.

ME.—Uncommon winter visitor coastwise, casual inland;
Late Nov.—Mar. 15.
N. H.—Uncommon winter visitor coastwise; casual inland.
VT.—Accidental winter visitor.
Mass.—Uncommon winter visitor, coastwise; casual inland.
(Sept.) Nov. 4—May 1.
R. I.—Rare and irregular winter visitor coastwise; casual inland.
Nov. 14—April 27.
Conn.—Rare and irregular winter visitor coastwise; casual inland. (Sept.) Nov. 10.

LONGIPENNES.

15. Megalestris skua (Brünnich) Ridgway.

Skua; Great Skua; Sea-hen.

Catharacta skua Brünn., Ornith. borealis, 1764, p. 33. "E Feroa & Islandia."
LONGIPENNES.

STERCORARIIDAE.

Pelagie; nests on rocky cliffs or tundras.

Mass.—Rare visitor offshore: Georges Banks, July, 1878; Nantucket Shoals, Oct. 11, 1883; Polluck Rip, Sept. 10, 1884.

16. Stercorarius pomarinus (Temminck) Vieillot.

Pomarine jaeger.

Largely marine; nests on the ground.

Me.—Uncommon migrant, casual in summer. May; (June 23, 24); July 14–late Oct.

17. Stercorarius parasiticus (Linne) Schäffer.

Parasitic jaeger; Gull chaser; Marlinspike; Richardson’s jaeger; Robber gull; Sea hen.

Largely marine; nests on the ground.

LONGIPENNES.  

STERCORARIDAE.  

Mass.—Uncommon migrant and summer visitor offshore; rare in winter.  May 31–Oct. 14 (Jan., Feb.).
R. 1.—Rare migrant offshore: Charlestown Beach, three, Sept. 2, 1897.
Conn.—Rare migrant offshore: Bridgeport; Portland, fall, 1875.

Long-tailed jaeger; Buffon’s jaeger or skua; Marlinspike; Whiptail.

Largely marine; nests on the ground.

Me.—Rare migrant offshore.
Vt.—Accidental migrant: West Castleton, Sept. 7, 1877.
Mass.—Rare migrant.  Spring; Aug. 24–Sept. 29.
Conn.—Rare or accidental visitor: Community Lake, Wallingford, Aug. 30, 1873.

LARIDAE.

Ivory gull.

Arctic seas, following the pack ice; nests on rocky cliffs.
LONGIPENNES.

LARIDAE.

Me.—The Boardman record refers to a New Brunswick specimen.

Mass.—Accidental winter visitor: Monomoy Id., Dec. 1, 1886.

20. Rissa tridactyla (Linné) Bonaparte.

Kittiwake; Frost-bird; Jack gull; Meterick; Pinny owl or Pinyole; Snow gull; Winter gull.

Maritime; nests on sea cliffs.

Me.—Common fall and winter visitor offshore; casual inland, and in summer. Nov.—April (June; July 11, 1903, Jericho Bay, barren bird; July 14, 1907, off Portland).

N. H.—Common fall and winter visitor offshore. Nov. 1—spring.

Vt.—Rare winter visitor: Enosburg Falls, Nov. 12, 1906; St. Albans; St. Johnsbury.

Mass.—Common fall and winter visitor offshore, casual inland. Sept. 6—Mar. 10.

Conn.—Uncommon fall and winter visitor offshore. Fall—April 14.

Glaucous gull; Burgomaster; Owl gull; White minister.

Seacoasts; nests on cliffs.
LONGIPENNES.

LARIDAE.

Me.—Rare winter visitor. Late Nov.—April 27.
N. H.—Rare winter visitor: Hampton, about Feb. 20, 1886, and in May.
Vt.—Doubtfully recorded.
Mass.—Rare winter visitor. Nov. 29—April 23 (May 26, 1907, Ipswich).
R. I.—Rare winter visitor: Newport, Mar. 12, 1900 (three): Dec. 1901.

22. Larus leucopterus Faber.

Iceland gull; White-winged gull.

Audubon, Birds of Amer., 1844, vol. 7, pl. 447. Egg, Seebohm 1896, p. 113, pl. 33, fig. 3.
Seacoasts; nests on the ground.

Me.—Rare winter visitor. Nov.—April.
Mass.—Rare winter visitor. Nov. 4—Mar. 20.
Conn.—Rare winter visitor: Stamford, Feb. 16, 1894.

23. Larus kumlieni Brewster.

Kumlien’s gull; Lesser glaucous-winged gull.

Coastwise; breeds on Arctic coasts.

Me.—Probably occasional winter visitor: near Eastport (may have been N. B.); “seen” in Portland Harbor and at Scarborough.
Mass.—Rare winter visitor: Boston Harbor, Feb. 22, 1905;
LONGIPENNES.

LARIDAE.

Plymouth, Jan. 5, 1888 (Dwight, immature); Boston and Swampscott, two or more, Dec. 29, 1907–Mar. 13, 1908.

Conn.—Rare winter visitor: Stamford, Feb. 16, 1894 (Dwight, immature).

Great black-backed gull; Black-back; Black minister; Coffin carrier; Ghost-bird; Minister; Saddle-back.

Seacoasts; nests on the ground.

Me.—Common migrant and winter resident; casual summer visitor. Sept. 21–April (summer).

Mass.—Common winter resident coastwise; a few non-breeding birds summer. Late Aug.–May 1 (summer).

R. I.—Common winter resident coastwise. Aug. 26–April 23.

Conn.—Uncommon winter resident coastwise. Fall–Mar.

25. Larus argentatus Pontoppidan.

Herring gull; Gray gull; Sea gull; Winter gull.

Seacoasts, large rivers and lakes; nests on the ground or rarely in trees.

Me.—Abundant resident, breeding mainly on outer islands, rarely on inland lakes. Eggs, (May 14) June 12–July 18 (Aug. 19).
LONGIPENNES. LARIDAE.

N. H.—Common migrant and winter resident; less common summer visitor coastwise.

Vt.—Uncommon migrant and rare summer resident (Lake Champlain).

Mass.—Common migrant and winter resident, less common summer visitor coastwise; not now known to breed (nested at Wepecket Id., 1882, Mackay).

R. I.—Common migrant and winter resident, mainly coastwise; a few non-breeding birds summer. Sept. 10–May 22; summer.

Conn.—Common migrant and winter resident, mainly coastwise; a few non-breeding birds summer. Oct.–May; summer.

26. Larus delawarensis Ord.

Ring-billed gull.

Seacoasts; nests on the ground.

Conn.—Uncommon migrant and winter resident.
27. **Larus atricilla** Linne.

**Laughing gull; Black-headed gull; Black-poll.**

Seacoasts; nests on the ground.

**ME.**—Rare summer resident (Metinic Green Id., Western Egg Rock). (Late April)–Sept. Eggs, June 30–July 5.

**VT.**—Rare visitor: Bristol, May, 1883; St. Albans.

**Mass.**—Uncommon summer resident south of Cape Cod (Muskeget Id.; formerly at Egg Rock, Nahant); elsewhere a rare visitor. May 7–Oct. 1 (late Nov.). Eggs, June 7–July 10.

**R. I.**—Rare summer visitor: Seakonnet Point, Sept., 1884; Seakonnet Point, Aug. 24, 1903.

**Conn.**—Rare summer visitor; may breed rarely.

28. **Larus philadelphia** (Ord) Gray.

**Bonaparte's gull.**

Salt and fresh water; nests on stumps or in low trees.

**ME.**—Common migrant, rare in winter. April–June 20; July 25–Nov. 20 (winter).

**N. H.**—Common migrant and rare winter resident coastwise. May; Aug. 3–Oct. 20 (winter).

**VT.**—Rare migrant; ? "summer resident."

**Mass.**—Common migrant, mainly coastwise, and rare winter resident. Mar. 10–June 3; July 24–Nov. 25 (winter).
LONGIPENNES.

LARIDAE.

R. I.—Common migrant and uncommon winter resident. Aug. 5–May 22.

Conn.—Common migrant, mainly in fall. Aug. 1–Nov.; (winter ?)–April 21.

29. *Xema sabinii* (Sabine) Leach.

_Sabine's gull; Fork-tailed gull._

Arctic seas and coasts; nests on the ground.

Me.—Accidental visitor: Brothers Id., near Portland, Sept. 22, 1899; Scarborough, May 31, 1877; (ne Calais, 1878).

Mass.—Accidental visitor: Boston Harbor, Sept. 27, 1874; Cape Cod, 1888; North Truro, Aug. 21, 1889.

R. I.—Doubtfully recorded.

_Gull-billed tern; Marsh tern._

*Sterna nilotica* Hasselq., Reise nach Pal., deutsch. ausg., 1762, p. 325. [Nile River, Egypt].

Seacoasts; nests on the ground.

Me.—Accidental visitor, several instances. March; May 21; Sept.

R. I.—Doubtfully recorded.
31. **Sterna caspia** Pallas.

**Caspian tern; Squawker.**

*Sterna tschegrava* Lepech. Chapman, Handb. birds east. No. Amer., 1895, p. 79, fig. 61, a.

Seacoasts and lakes; nests on the ground.

ME.—Rare migrant. May 11; Aug.–Sept. (Oct. 16).

N. H.—Rare migrant: Hampton, 1899.

Mass.—Rare spring and uncommon fall migrant. Early May; Aug. 8–Sept. 26.

32. **Sterna maxima** Bodd.aert.

**Royal tern; Cayenne tern.**

Seacoasts and lagoons; nests on the ground.

Mass.—Accidental visitor: Chatham, July 29, 1889; Ipswich, July 17, 1904; Nantucket, July 1, 1874.

33. **Sterna sandvicensis acuflavida** (Cabot) Ridgway.

**Cabot’s tern.**

LONGIPENNES.  

LARIDAE.

Seacoasts; nests on the ground.

34. _Sterna forsteri_ Nuttall.

_Forster's tern._

_ Sterna havellii_ Audubon, Birds of Amer., 1844, vol. 7, p. 103, pl. 434.

Marshes and sea coasts; nests in grassy marshes.

Mass.—Rare fall migrant. Aug.–Oct. 2.

35. _Sterna hirundo_ Linné.

Common tern; Mackerel gull; Medrake or Medrick; Red-shank; Sea swallow; Summer gull; Wilson's tern.

Seacoasts; nests on sandy or pebbly shores.

N. H.—Common migrant coastwise, casual inland; formerly summer resident at Isles of Shoals. May; Aug.–Sept.

Vt.—Rare visitor: Bennington, May 30, 1907; St. Albans.
LONGIPENNES.

LARIDAE.

Conn.—Common local summer resident coastwise. Eggs, June 20.

36. Sterna paradisaea Brünnich.

Arctic tern.

Brünn., Ornith. borealis, 1764, p. 46. "Christiansøe," Denmark. Chapman, Handb. birds east. No. Amer., 1895, p. 82, fig. 61, d.

Seacoasts; nests on the ground.

Mass.—Uncommon local summer resident coastwise; occasional inland. May–Oct.

Conn.—Migrant.

37. Sterna dougalli Montagu.

Roseate tern; Mackerel gull.

Montagu, Ornith. dict., suppl., 1813, p. [386], 1 pl. "west Highlands of Scotland." Chapman, Handb. birds east. No. Amer., 1895, p. 83, fig. 61, c; Dresser, Birds of Europe, 1871–81, vol. 8, pl. [581]. Egg, Capen, 1886, pl. 23, fig. 9–11.

Seacoasts; nests on sandy or pebbly shores.
LONGIPENNES.

LARIDAE.

Me.—Rare summer visitor coastwise; not certainly known to breed. May–Aug. 31.

N. H.—Formerly rare summer resident at Isles of Shoals.

R. I.—Common migrant and summer visitor; not known to nest. May–Oct.

Conn.—Common migrant and local summer resident. Eggs, June 20.

38. Sterna antillarum (Lesson) Coues.

Least tern; Little striker; Oyt.

Seacoasts and lakes; nests on the ground.

Me.—Formerly rare summer resident in Casco Bay.

N. H.—Rare migrant: Hampton.

R. I.—Now rare but formerly a more common summer visitor coastwise. —Aug. 20.

Conn.—Rare migrant and summer visitor, formerly common.

Sooty tern; Egg-bird.

LONGIPENNES.

LARIDAE.

Seacoasts; nests on sandy shores.

Vt.—Accidental visitor: Lake Champlain, early Sept. 1876; Rutland, 1876.

Mass.—Accidental visitor: Chatham, Sept. 1877; Lawrence, Oct. 20, 1876; Williamstown, Sept. 1876.

R. I.—Accidental visitor: (?) Newport, 1877; Point Judith, Sept. 1876; Woonsocket, July 16, 1897.

Conn.—Accidental visitor. Sept.

40. **Hydrochelidon nigra surinamensis** (Gmelin) Stejneger.

Black tern.

Fresh and salt water; nests in fresh marshes.

Vt.—Rare migrant: Lake Bomoseen, June 6, 1883.

Mass.—Rare spring and uncommon early fall migrant. June 7–10; (July 11) Aug. 8–Sept. 26.

Conn.—Uncommon migrant coastwise, mainly in fall. Aug. 24.

**Black skimmer; Cut-water; Scissor-bill; Sea-crow; Sea-dog; Razor-bill.**

Seacoasts; nests on sandy shores.

Me.—Accidental visitor: Matinicus Id.; off Saco, Aug. 31, 1879; Washington Co.; Wells Bay.

Mass.—Occasional summer visitor coastwise, said to have bred about 1830 at Muskeget Id.; casual inland (Springfield). July 16–Aug. 19.

Conn.—Accidental visitor: Stonington (Linsley).

**Tubinares.**

**Procellariidae.**

42. *Fulmarus glacialis* (Linné) Stephens.

**Fulmar; Marbleheader; Noddy; Oil-bird.**

Mainly pelagic; nests in shallow burrows or on cliffs.

Me.—Rare winter visitor offshore: "coast of Maine," March, 1879.

Mass.—Rare fall and winter visitor offshore: Georges Bank. Oct. 28–winter.
TUBINARES.

PROCILLARIIDAE.

43. Puffinus borealis Cory.

*Cory's shearwater.*

Cory, Bull. Nuttall ornith. club, 1881, vol. 6, p. 84. "near Chatham Island, Cape Cod, Mass."

Pelagic; nest unknown.

Mass.—Uncommon summer and fall visitor offshore. Aug. 2–Nov.

44. Puffinus gravis (O'Reilly) Salvin.

*Greater shearwater; Hag; Hagdon.*

*Procellaria gravis* O'Reilly, Greenland, adjacent seas, and northwest pass., 1818, p. 140, pl. 12, fig. 1. "Latitude of Cape Farewell and Staten Hook," Greenland.

Pelagic; nest and eggs unknown.

Me.—Common summer visitor offshore. Aug. 10.

N. H.—Summer visitor offshore: Portsmouth.

Mass.—Common summer and fall visitor offshore; casual inland (Dover). May 26–Nov. (? Dec. 31).

R. I.—Uncommon summer and fall visitor offshore.

Conn.—Uncommon summer and fall visitor offshore.

45. Puffinus griseus (Gmelin) Finsch.

*Sooty shearwater; Black hag or hagdon.*

Godman, Monogr. petrels, 1908, pt. 2, p. 145, pl. 38.

"In hemisphaerio australi, inter 35° & 50°."

Pelagic; nests in burrows on sea islands.
TUBINARES.

PROCELLARIIDAE.

Me.—Common summer visitor offshore. May—summer.
Mass.—Common summer and fall visitor offshore. (Mar.) July 4—Oct.

46. Aestrelata hasitata (Kuhl) Coues.

Black-capped petrel; Diablotin.

Oestrelata haesitata (Kuhl). Godman, Monogr. petrels, 1908, pt. 3, p. 184, pl. 49.
Mainly pelagic; nests in burrows on islands.

Vt.—Accidental visitor: last of August, 1893 (place unknown).

47. Daption capensis (Linne) Stephens.

Pintado petrel; Cape pigeon.

Pelagic; nests in burrows on islands of southern hemisphere.

Me.—Accidental visitor: Lake Mooseluckmeguntic, Sept. 1872 (nee Harpswell).

48. Oceanodroma leucorhoa (Vieillot) Stejneger.

Leach’s petrel; Carey chicken; Mother Carey’s chicken.

TUBINARES.

PROCELLARIIDAE.

Pelagic; nests in colonies on islands, in burrows.

**N. H.**—Common migrant offshore; occasional inland in fall. Spring–Nov.

**Vt.**—Accidental visitor: Lake Champlain.

**Mass.**—Common migrant offshore; casual inland in fall. June 21; Sept. 1–Nov. 25.

**Conn.**—Uncommon migrant offshore, casual inland. Oct. 27.

49. **Oceanites oceanicus** (Kuhl) Lichtenstein.

**Wilson’s petrel; Mother Carey’s chicken.**

*Procellaria oceanica* Kuhl, Beitr. z. zool., 1820, pt. 2, p. 136, pl. 10, fig. 1. No locality given.

Pelagic; nests within Antarctic circle, in burrows.

**Me.**—Common summer visitor offshore; casual inland (near Augusta). June–Sept. 17.

**N. H.**—Common summer visitor offshore.

**Vt.**—Accidental visitor: St. Albans (may have been *O. leucocorhoa*).

**Conn.**—Uncommon summer visitor offshore.
50. **Sula leucogastra** (Boddart) Selater & Salvin.

**Booby; Booby gannet.**

Seacoasts; nests on the ground.

**Mass.**—Accidental visitor: Cape Cod, about Sept. 17, 1878 (*nee* Essex Co.).

**Conn.**—Linsley’s record (Guilford) said to refer to *S. bassana*.

51. **Sula bassana** (Linné) Boie.

**Gannet; Solan goose; White gannet.**

Coastwise; nests in colonies on a few rocky islets of North Atlantic.

**Me., N. H.**—Uncommon migrant. April–May; Sept.–Oct. 9.

**Conn.**—Rare migrant offshore.
52. Phalacrocorax carbo (Linné) Leach.

Cormorant; Common cormorant; Shag; Taunton shag; Taunton turkey.

"In Europa."

Salt water mainly; nests in colonies on sea cliffs.

Me.—Common migrant and uncommon winter resident. Oct.—April 20.

Vt.—Rare migrant: Rutland, 1867.

Mass.—Uncommon migrant and rare winter resident coastwise. April–May 14; Sept. 22–Nov. (winter).

R. I.—Uncommon migrant and winter resident. Sept. 15–(June 3).

Conn.—Uncommon migrant and winter resident. Fall–May.

53. Phalacrocorax auritus (Lesson) Grant.

Double-crested cormorant; Shag; Taunton turkey.

Coastal; nests in colonies on sea cliffs.

Me.—Common migrant; rare winter and summer (Black Horse Ledge) resident. Eggs, June 23–July 3.

N. H.—Uncommon migrant coastwise; occasional inland. Spring; Oct.
STEGANOPODES.

PHALACROCORACIDAE.

Vt.—Rare migrant: Burlington, Nov.; Cambridge, Dec.; Windsor.
Mass.—Common migrant, mainly coastwise. April 4–June 18 (July 7); Aug. 22–Nov. 24.
Conn.—Uncommon migrant, mainly coastwise. April–May; mid-July–Nov. 13.

PELECANIDAE.

54. Pelecanus erythrorhynchos Gmelin.

American white pelican.

Pelecanus americanus Audubon, Birds of Amer., 1844, vol. 7, p. 20, pl. 422.
Salt and fresh water; nests on the ground.

Me.—Accidental visitor: Calais, Eliot, pair, June 8, 1897; Saponic Lake, May 28, 1892.
N. H.—Formerly a visitor (Belknap).
Mass.—Accidental visitor: Gloucester, 1886; North Scituate, Oct. 5, 1876; Sandwich, May 13, 1905.

55. Pelecanus occidentalis (Linné) Richmond.

Brown pelican.

Coastal; nests on the ground or in low trees.
STEGANOPODES.

PELECANIDAE.

Me.—The supposed Bar Harbor specimen was an escape brought from South America.

Mass.—Accidental visitor: (? Ipswich, doubtful); Nantucket, about 1867 (flock of 13).

Conn.—Accidental visitor: near New Haven.

FREGATIDAE.

56. Fregata aquila (Linné) Reichenbach.

Man-o'-war bird; Frigate-bird; Man-o'-war hawk.

Coastal; nests in colonies, in low trees or on ground.

Me.—Doubtfully recorded from Boothbay.

Conn.—Accidental visitor: Faulkner’s Id., autumn, 1859.

ANSERES.

ANATIDAE.

57. Mergus americanus Cassin.

American Merganser; Buff-breasted Merganser; Goosander; Pond sheldrake.

Mergus merganser Linné. Audubon, Birds of Amer., 1843, vol. 6, p. 387, pl. 411. Egg, Capen, 1886, pl. 21, fig. 5.

Mainly in fresh water; nests in hollow trees.
ANSERES.

ANATIDAE.

Me.—Common migrant and winter resident; less common summer resident inland. Eggs, late May–June 19.

N. H.—Common migrant; less common summer resident from White Mts. north, and winter resident in open streams south of White Mts.

Vt.—Uncommon summer resident; rare winter resident in open streams. Eggs, June 18.

Mass.—Uncommon migrant and winter resident, mainly on freshwater lakes and streams; said to have bred formerly. Oct. 12–May 1; summer (Springfield).

Conn.—Uncommon migrant and winter resident, mainly on ponds and rivers. Fall–April 17.

58. Mergus serrator Linné.

Red-breasted Merganser; Shelldrake.

Salt and fresh water; nests on the ground.

Me.—Common migrant and winter resident coastwise; uncommon summer resident on coastal islands or inland lakes. Eggs, June 21.

Vt.—Uncommon migrant. April; Oct.

Mass.—Common migrant and winter resident, mainly coastwise; a few non-breeding birds summer offshore. Sept. 23–May 26 (summer).
ANSERES.

ANATIDAE.

Linné, Syst. nat., ed. 12, 1766, vol. 1, p. 263. "in America
FAUNA OF NEW ENGLAND.

PALUDICOLAE.

RALLIDAE.

Fresh and brackish marshes; nests on the ground.

Me.—Rare summer resident. Late April–Oct.

Vt.—Rare summer resident locally: Burlington; Rutland Co.

Mass.—Summer resident, more common near coast; rare winter resident (Cape Cod). April 11–Nov. 27 (Jan. 1, 1891, Worcester) (winter). Eggs, May 12–June 1.

Conn.—Common migrant and summer resident. Eggs, June 6.

120. Porzana carolina (Linné) Baird.

Sora; Carolina rail; Meadow-hen; Rail-bird.

"in America septentrionali."

Fresh and brackish marshes; nests on the ground.

Vt.—Uncommon summer resident.

121. *Coturnicops noveboracensis* (Gmelin) Bonaparte.

**Yellow rail.**

*Rallus noveboracensis* (Lath.). Bonaparte, Amer. ornith., 1833, vol. 4, p. 136, pl. 27, fig. 2. Egg, Capen, 1886, pl. 20, fig. 6.

Freshwater marshes; nests on the ground.

**ME.**—Rare migrant and said to have bred near Calais. May 31; Oct. 4–Nov. 15.

**N. H.**—Rare migrant: Hampton.

**Vt.**—Rare migrant: Newport; northern Vt.; Rutland Co.

**Mass.**—Rare migrant and possible summer resident. April–May 26; Sept. 2–Oct. 22.

**R. I.**—Rare migrant (five records). Sept. 28.

**Conn.**—Rare spring and uncommon fall migrant; said to have bred at Middletown, 1874, 1875. (Mar. 24, Gaylordsville); Sept.–Oct. 14 (Nov. 10).

122. *Creciscus jamaicensis* (Gmelin) Cabanis.

**Black rail; Little black rail.**

Freshwater marshes; nests on the ground.

**ME.**—Doubtfully recorded from Scarborough, Oct. 4, 1881.

**Conn.**—Very rare summer resident (at Lyme, Saybrook); also taken at Hazenville. Eggs, June 6–July 10.
123. *Crex crex* (Linné) Sharpe.

**Corn crake; Daker-hen; European land rail.**

Coutes, Key to No. Amer. birds, ed. 5, 1903, vol. 2, p. 859.

Grassy meadows and grain fields; nests on the ground.

Conn.—Accidental visitor: Saybrook, Oct. 20, 1887.

124. *Ionornis martinica* (Linné) Reichenbach.

**Purple gallinule.**

Freshwater marshes; nests among rushes.

N. H.—Accidental visitor: Dover; Rye.

Vt.—Doubtfully recorded.

Mass.—Occasional visitor, mainly in April and Oct.–Nov., once in June.

R. I.—Occasional visitor. Jan.; May; June 8, 1902, Seaconnet Point; Aug.; fall.

Conn.—Rare visitor: Middletown, 1855.

125. *Gallinula galeata* (Lichtenstein) Bonaparte.

**Florida gallinule; Pond hen; Red-billed mud-hen.**

AVES.

PALUDICOLAE.

RALLIDAE.

Me.—Rare migrant and (?) summer resident. May 5; Sept. 20–Oct. 16.

Vt.—Rare local summer resident at Lake Bomoseen, Lake Champlain, St. Albans. April 28–fall. Eggs, May 28–June 5.

Mass.—Rare local summer resident, mainly near coast. April 29–Oct. 25 (Nov. 9). Eggs, June 5–July 17.

R. I.—Uncommon local summer resident. May–Nov. 29.

Conn.—Uncommon local summer resident. Eggs, June 25 (Stratford).

126. Fulica americana Gmelin.

American coot; Blue Peter; Coot; Marsh hen; Mud-hen; Pond crow; Pond hen.

Me.—Uncommon migrant, mainly in fall. (Mar. 23) April 14–May 13; Oct. 26–Nov.

Vt.—Uncommon migrant and rare summer resident (Lake Bomoseen).

Mass.—Rare spring and uncommon fall migrant; rare winter resident near coast; may breed rarely (pair, Cheshire reservoir, June 21, 1892). Mar. 29–April 25; (June 21); (Aug. 16) Sept. 3–Nov. (winter).
PALUDICOLAE.  

RALLIDAE.  

Conn.—Common migrant, mainly in fall. Spring; Sept. 29—Nov. 14.  

LIMICOLAE.  

PHALAROPIDAE.  

127. Phalaropus fulicarius (Linne) Bonaparte.  

Red phalarope; Bank-bird; Brown bank-bird; Gray phalarope; Gulf-bird; Sea goose; Whale-bird.  

Audubon, Birds of Amer., 1842, vol. 5, p. 291, pl. 339. Egg, Capen, 1886, pl. 18, fig. 11; pl. 19, fig. 1.  
Chiefly maritime; nests on the ground in marshes.  

Me.—Uncommon migrant, mainly offshore, and rare summer resident (near Calais). May 8—17; (summer); July 25—Oct. 17.  
N. H.—Migrant, mainly offshore; sometimes common. May; Oct.  
Vt.—Rare migrant at Lake Champlain.  
Mass.—Offshore migrant, irregularly common. May 1—26; Aug. 31—Nov. 24.  
R. I., Conn.—Offshore migrant, sometimes common. Late May; Sept. 26—Dec. 20.  

128. Lobipes lobatus (Linne) Baird, Brewer, & Ridgway.  

Northern phalarope; Bank-bird; Jersey goose; Mackerel goose; Red-necked phalarope; Sea goose; Sea snipe; Whale-bird; White bank-bird.  

Chiefly maritime; nests on the ground in marshes.
LIMICOLAE.

PHALAROPODIDAE.

ME.—Common migrant, mainly offshore. (Feb.) May 3–June 15; July 24–Nov.

N. H.—Common migrant, mainly offshore. May; Aug. 9–Sept. 22.

R. I.—Common migrant, mainly offshore. May; Aug. 16–Sept. 15.

129. Steganopus tricolor Vieillot.

Wilson’s phalarope.

Chiefly freshwater marshes; nests on the ground.

ME.—Accidental visitor: Sabattus Pond, Sept. or Oct. 1906; Scarborough, three, June 9, 1891.

Conn.—Accidental visitor: Bridgeport.

RECURVIROSTRIDAE.

130. Recurvirostra americana Gmelin.

American avocet.

LIMICOLAE

RECURVIROSTRIDAE.

Open lowlands and marshes; nests on the ground.

Me.—Accidental visitor: Cape Elizabeth, Nov. 5, 1878.
Vt.—Accidental visitor: St. Albans, fall, 1875, and 1890; (nee Rutland, 1882).
Conn.—Accidental visitor: between Saybrook and East Lyme, 1871.

131. Himantopus mexicanus (Müller) Ord.

Black-necked stilt.

Charadrius mexicanus Müll., Linné’s Vollstand. natursyst., suppl., 1776, p. 117. “Mexico.”
Salt marshes and lagoons; nests on the ground.

Me.—Accidental visitor: Rockland, May, 1889; (nee Boardman, New Brunswick).

N. H.—Accidental visitor: Rye Beach.
Mass.—Accidental visitor: Lynn; Mass. coast.

SCOLOPACIDAE.

132. Philohela minor (Gmelin) Gray.

American woodcock; Bog-sucker; Woodcock.

Microptera americana Audubon, Birds of Amer., 1843, vol. 6, p. 15, pl. 352. Egg, Capen, 1886, pl. 19, fig. 2.
Freshwater swamps, damp woods and thickets; nests on the ground.
LIMICOLAE.

SCOLOPACIDAE.

ME.—Common migrant and summer resident; possibly winters. (Mar. 10) Mar. 23—Nov. 30 (Dec. 18) (Feb., two instances). Eggs, April 26—May 19.

Mass.—Common migrant and uncommon summer resident; rare in winter. Mar. 4—Nov. 25 (winter). Eggs, April 11—May 6.

133. Gallinago delicata (Ord) A. O. U. check-list.

Wilson’s snipe; Alewife-bird; Common snipe; English snipe; Jack snipe.

Fresh and brackish meadows and marshes; nests on the ground.

ME.—Common migrant and rare summer resident. April 19—May 15; summer; Sept.—Nov. 15.

N. H.—Common migrant, mainly coastwise; very rare winter resident (Nashua). Mar.—May 7; July 22—mid-Dec. (winter).

Vt.—Uncommon migrant and rare winter resident (Rutland Co.); ? “summer resident.”

Mass.—Common migrant, rare winter resident; rare and irregular summer resident (at Carlisle, Concord). (Mar. 8) Mar. 20—May 18; (summer); Aug. 1—Nov. 30 (winter).
FAUNA OF NEW ENGLAND.

LIMICOLAE.

SCOLOPACIDAE.

Conn.—Common migrant, rare summer and winter resident. Mar. 18–Dec.; winter. Eggs, May 13 (Portland).

134. Macrorhamphus griseus (Gmelin) Leach.

Dowitcher; Brownback; Deutscher; Fool plover; German snipe; Grayback; Gray snipe; Red-breasted snipe; Robin snipe.

Chiefly maritime marshes and mudflats; nests on the ground.

Mass.—Rare spring and uncommon fall migrant, mainly coastwise. May 1–June 7 (June 18); July 5–Sept. 30.

Conn.—Uncommon migrant, mainly in fall.

135. Macrorhamphus scolopaceus (Say) Lawrence.

Long-billed dowitcher.

Chiefly maritime marshes and mudflats; nests on the ground.

Mass.—Rare fall migrant. Aug. 29–Nov. 3.

R. I.—Rare fall migrant: Middletown, Oct. 8, 1890.
136. Micropalama himantopus (Bonaparte) Baird.

Stilt sandpiper; Bastard yellow-leg; Long-legged sandpiper; Mongrel.

Marshes and mudflats; nests on the ground.

N. H.—Rare fall migrant coastwise. July 31–Aug. 28.

R. I.—Very rare spring and uncommon fall migrant. May 9, 1895, Sakonnet Point; July 6–Sept. 19.

Conn.—Rare migrant: New Haven, Sept. 16, 1886.

137. Tringa canutus Linné.

Knot; Ash-colored sandpiper; Blue plover; Grayback; Gray snipe; Red-breasted plover or sandpiper; Robin snipe; Silver plover.

Egg, Seebohm, 1896, p. 144, pl. 43, fig. 10.

Sandy beaches; nests on the ground.

Mass.—Common migrant coastwise, casual inland (Springfield); rare winter resident. May 11–June 5 (June 25); July 13–Nov. 8 (winter).

Conn.—Common migrant coastwise.

**Purple sandpiper; Rock snipe; Winter peep; Winter snipe.**

Rocky islands and coasts of the sea; nests on the ground.

ME.—Common migrant and winter resident coastwise; accidental in summer. Sept. 15–April (Aug. 6, 1907, Metinic Green Id.; Aug. 11, 1902, Metinic reef).

N. H.—Rare winter visitor coastwise.

VT.—Doubtfully recorded.

MASS.—Common fall and winter visitor coastwise. (July 30) Sept. 6–April 19 (May 11).

R. I.—Common winter resident on rocky coasts. Sept. 13–April 15.

CONN.—Common winter resident on rocky islands coastwise.

**Pectoral sandpiper; Brown-back; Creaker or Krieker; Grass-bird; Grass snipe; Jack snipe; Pert; Squatter.**

Marshes and mudflats; nests on the ground.

ME.—Rare spring and common fall migrant, mainly coastwise. (Spring); Aug. 13–Oct. 5.

LIMICOLAE.

SCOLOPACIDAE.

Vt.— Uncommon fall migrant.
Mass.— Rare spring and common fall migrant. (April 4) April 9–May 16 (May 23); July 15–Nov. 11.
R. I.— Rare spring and common fall migrant. April 25; July 16–Oct. 20.
Conn.— Rare spring and common fall migrant.

140. Pisobia fuscicollis (Vieillot) A. O. U. comm.

White-rumped sandpiper; Bonaparte’s sandpiper; Bull-peep; Schinz’s sandpiper.

Beaches and marshy shores; nests on the ground.

Me.— Uncommon migrant, mainly coastwise. May 29, 30; late July–Oct. 23 (Nov. 18).

Mass.— Rare spring and common fall migrant mainly coastwise.
May 15–June 5; July 10–Nov. 10.
Conn.— Uncommon migrant. Aug. 31.

141. Pisobia bairdii (Coues) A. O. U. comm.

Baird’s sandpiper.

Beaches and marshes; nests on the ground.

Me.—Rare fall migrant. Aug. 7–Sept. 20 (Nov. 1, 1881, Bangor).

N. H.—Rare fall migrant. Aug. 26–Sept 5.

Conn.—Rare fall migrant: New Haven, Oct. 19, 1889, Oct. 28, 1887; Stratford, Nov. 3, 1888.

Least sandpiper; Bumble bee; Meadow ox-eye; Mud peep; Peep; Wilson's sandpiper.

Marshes and mudflats; nests on the ground.

Me.—Common migrant. May 13–24 (June); July 5–Oct. 1 (Oct. 15).

N. H.—Common migrant. Late May–June 3; July 10–Sept.

Vt.—Uncommon migrant.

143. *Pelidna alpina* (Linné) C. L. Brehm.

European dunlin.

AVES.

75

LIMICOLAE.

SCOLOPACIDAE.

Beaches and marshes; nests on the ground.

Mass.—Accidental from Old World: Chatham, Aug. 11, 1900.

144. Pelidna alpina sakhalina (Vieillot) Buturlin.

American dunlin; Black-bellied sandpiper; Black-breast; Brant-bird; Crooked-billed snipe; Fall snipe; Lead-back; Ox-bird; Ox-eye; Red-back; Red-backed sandpiper.

Beaches and marshes; nests on the ground.

ME.—Rare spring and commoner fall migrant coastwise
Late May; Oct.—Nov. 17.

Mass.—Rare spring and common fall migrant coastwise.
(?) Mar. 15) late April—May 20 (June 18); Sept. 1—Dec. 13 (Dec. 24).

R. I.—Rare spring and common fall migrant coastwise. May; Aug. 29—Oct. 29.

Conn.—Rare spring and common fall migrant: "may winter."

145. Erolia ferruginea (Brünnich) A. O. U. comm.

Curlew sandpiper.

Seacoasts and tundras; nests on the ground.
FAUNA OF NEW ENGLAND.

LIMICOLAE.

SCOLOPACIDAE.

Mass.—Accidental visitor: five records. May; Aug.
R. I.—Doubtfully recorded.
Conn.—Accidental visitor: four records. (June 1874, New Haven); Aug. 30–Oct. 3.

146. *Ereunetes pusillus* (Linné) Cassin.

Semipalmated sandpiper; Black-legged peep; Peep; Sand ox-eye; Sand peep.

Sand beaches and marshes; nests on the ground.

Me.—Common migrant. May–June 5; July 29–Sept. 28 (Oct.).
Vt.—Uncommon migrant to larger lakes.
Mass.—Common migrant; non-breeding birds occur in summer coastwise. (May 1) May 13–June 14; (summer); July 3–Oct. 8 (Oct. 30).

147. *Ereunetes mauri* Cabanis.

**Western semipalmated sandpiper**

Sand beaches and marshes; nests on the ground.
R. I.— Rare fall migrant: Middletown, Aug. 25, and Aug. 29, 1899.
Conn.— Rare fall migrant: Lyme, Sept. 4, 1889 (six).

148. **Calidris leucophaeas** (Pallas) A. O. U. comm.

Sanderling; Beach-bird; Beach plover; Bull-peep; Gray-back; Ruddy plover; Surf snipe; Whitey; Whiting.

*Tringa leucophaeas* Pallas, in Vroeg’s Catalogue, 1764, p. 32.

North Sea coast.

Sand beaches; nests on the ground.

Vt.— Rare migrant. Sept.

Mass.— Common coastwise migrant and, south of Cape Cod, a winter resident. (Late April) May 19–June 4 (June 24); July 6–Dec. 6 (Dec. 13); winter.

R. I.— Common migrant, casual inland; probably a rare winter resident. (Mar. 20) May–June; Aug. 1–Nov. 5.

Conn.— Common migrant coastwise. May; July–Oct.

149. **Limosa fedoa** (Linné) Sabine.

Marbled godwit; Brown marlin; Red curlew.

Audubon, Birds of Amer., 1842, vol. 5, p. 331, pl. 348.

Beaches and marshes; nests on the ground.

Me.— Rare migrant. May, 1884 (Scarborough); Aug. 8–Sept. 13.
LIMICOLAE.

SCOLOPACIDAE.

N. H.—Rare migrant: Rye Beach, Aug. 27, 1868.
Vt.—Formerly a migrant.
Mass.—Rare migrant. May 20–23; July 17–Sept. 5.
R. I.—Rare migrant. Aug. 6–Oct. 2.
Conn.—Rare migrant. Aug.

150. **Limosa haemastica** (Linné) Coues.

_Hudsonian godwit; Black-tail; Goose-bird; Ring-tailed marlin; Spot-rump._

"In America septentrionali."
Beaches and marshes; nests on the ground.

ME.—Rare fall migrant coastwise.
Vt.—Rare migrant: Burlington.
Mass.—Rare (? spring and) fall migrant. (? April 29–May 25); July 15–Nov. 7.
Conn.—Rare migrant.

151. **Totanus melanoleucus** (Gmelin) Vieillot.

_Greater yellow-legs; Cucu; Greater tattler or telltale; Long-legged tattler; Stone snipe; Winter yellow-legs._

"Auctumno in arenis littoris Labrador."
Salt and fresh marshes; nests on the ground.
AVES.

LIMICOLAE.

SCOLOPACIDAE.

Me.—Common migrant and possibly a rare summer resident in extreme north (Woolastook valley). Late April–May 19 (July); late July–Oct. 22.

N. H.—Common migrant, mainly coastwise. May; July 17–Oct. 27.

Vt.—Uncommon migrant. May; fall.

Mass.—Common migrant mainly coastwise; a few non-breeding birds rarely summer. (Mar. 27) April 4–June 16 (June 28); July 6–Nov. 12.

R. I.—Common migrant. (? Mar. 10) April 10–May 26; July 20–Nov. 4.

Conn.—Common migrant. May 14–June 1 (June 13, 1898 New London); Aug–Nov. 15.

152. Totanus flavipes (Gmelin) Vieillot.

Yellow-legs; Lesser yellow-legs; Summer yellow-legs; Wandering tattler.

"IN NOVEBORACO."

Salt and fresh marshes; nests on the ground.

Me.—Rare spring and common fall migrant. May 16; late July–(Oct. 17).

N. H.—Rare spring and common fall migrant. May; Aug.–Sept. 4.

Vt.—Uncommon migrant.

Mass.—Rare spring and common early fall migrant. April 29–June 2 (June 15); July 10–Sept. 29 (Oct. 11 and 30).

R. I.—Rare spring and common fall migrant. April 28; July 3–Oct. 1.

Conn.—Rare spring and common fall migrant. May 7; Aug. 17–Oct.
FAUNA OF NEW ENGLAND.

SCOLOPACIDAE.

Solitary sandpiper or tattler.

Tringa solitaria Wils., Amer. ornith., 1813, vol. 7, p. 53, pl. 58, fig. 3. "Kentucky to New York."

Borders of woodland streams and ponds, rarely near salt water; nests on the ground or in other birds' deserted nests.

Me.—Common migrant and in northern part a rare summer resident (Woolastook valley). May 7–30; summer–Oct. 2 (Oct. 21).

N. H.—Common migrant, and possibly a rare summer resident. May 9–June; July 17–(Nov. 1).

Vt.—Common migrant; reported breeding at Lake Bomoseen, St. Albans Bay, Wells River. May–Sept. 3. Eggs, middle of May.

Mass.—Common migrant, mainly inland. May 2–26 (June); (July 8) July 20–Oct. 14 (Nov. 28).

Conn.—Common migrant. May 2–(June 10); Aug.–Sept.

154. Catoptrophorus semipalmatus (Gmelin) Bonaparte.

Willet; Goose-bird; Humility.

Salt and fresh marshes, and beaches; nests on the ground.

Vt.—Rare migrant: Middlebury.

Mass.—Rare migrant coastwise; formerly rare summer resident
LIMICOLAE.

SCOLOPACIDAE.

(Muskeget, about 1869, New Bedford). May 2–31 (June 17); July 8–Sept. 11.

R. I.—Rare migrant coastwise, mainly in fall. May; July 2–Sept. 18.

Conn.—Formerly a rare summer resident (Madison, Stratford), now only a rare migrant. May; (summer); Aug. 9–Oct. Eggs, June 5, 1873.

155. Catoptrophorus semipalmatus inornatus (Brewster)  
A. O. U. comm.

Western willet.

Salt and fresh marshes, and beaches; nests on the ground.

Mass.—Rare fall migrant: Newburyport, Aug. 5, 1908 (and probably most of those now found).

Conn.—Rare fall migrant: Stony Creek, Aug. 15, 1897, and other fall birds.

156. Pavoncella pugnax (Linné) Leach.

Ruff (♂); Reeve (♀).

Shores and marshes; nests on the ground.

Me.—Accidental from Old World: Camden, Sept. 14, 1900; Scarborough, April 10, 1870; Upton, Sept. 8, 1874.
LIMICOLAE.

SCOLOPACIDAE.

Mass.—Accidental visitor: Chatham, Sept. 12, 1880; Nantucket, July, 1901; Newburyport marshes, May 20, 1871.

157. Bartramia longicauda (Bechstein) Bonaparte.

Bartramian sandpiper; Field plover; Grass plover; Pasture plover; Upland plover.

Grassy prairies and fields; nests on the ground.

Mass.—Rare spring and uncommon fall migrant, rare local summer resident; formerly commoner. April 3–May 10; summer; July 16–Sept. 14. Eggs, May 25–June 3 (June 22).
R. I.—Uncommon migrant; formerly more common and probably bred. April; Aug. 2–Sept. 18.
Conn.—Formerly common summer resident; now an uncommon migrant. May 2; fall.

158. Tryngites subruficollis (Vieillot) Ridgway.

Buff-breasted sandpiper; Hill grass-bird.

LIMICOLAE

SCOLEPACIDAE.

ME.— Rare fall migrant coastwise. Aug.–Sept. 5.
N. H.— Rare fall migrant coastwise: Portsmouth; Rye Beach, Aug. 25 and 28, 1871.
Vt.— Doubtfully recorded.
R. I.— Rare fall migrant coastwise. Sept. 6–15.
Conn.— Rare fall migrant coastwise. Aug.–Sept. 30.

159. Actitis macularia (Linné) Naumann.

Spotted sandpiper; Ox-eye; Peet-weet; Sand lark; Teeter peep; Tip-tail; Tip-up.

Seacoast and freshwater streams and lakes; nests on the ground.

Vt.— Common migrant and summer resident at lower elevations. Late April–Sept.
Conn.— Common migrant and summer resident. Late April–Oct. 6. Eggs, May 31–June 1.
LIMICOLAE.

SCOLOPACIDAE.

160. Numenius americanus Bechstein.

Long-billed curlew; Great curlew; Hen curlew; Sickle-bill.

"New York & Hudson Bay."

Marshes and grassy flats; nests on the ground.

Me.—Very rare migrant. May 2; Aug.
Conn.—Formerly uncommon, now accidental migrant. Aug. 3.

Hudsonian curlew; Blue-legs (young); Foolish curlew (young); Jack curlew; Short-billed curlew.

Audubon, Birds of Amer., 1843, vol. 6, p. 42, pl. 356.
Beaches and marshes; nests on the ground.

Me.—Rare migrant. May 20; July 19–late Sept. (Oct. 12, 1898, Dover).
N. H.—Rare migrant. Aug. 6–Sept. 2.
Mass.—Rare spring and uncommon fall migrant. April 10–May 30 (June 8); (June 23) July 6–Oct. 1.
R. I.—Rare spring and uncommon fall migrant. April 27–May; July 2–Sept. 25.
Conn.—Rare migrant, mainly in fall. July 20–Aug. 27.

162. Numenius borealis (Forster) Latham.

Eskimo curlew; Dough-bird; Fute.

ME., N. H.—Formerly common fall migrant, coastwise. Late Aug.–Sept.

Mass.—Formerly a common fall migrant, accidental in spring. (Late May 1873, Cape Cod); July 15–Oct. 2.

R. I.—Formerly a common fall migrant coastwise. Aug. 27–Sept.

Conn.—Formerly a common fall migrant coastwise, now very rare. Aug.–Oct. 13.

Charadriidae.

163. Squatarola squatarola (Linne) Cuvier.

Black-bellied plover; Beetlehead; Blackbreast; Blackheart; Frost-bird; Ox-eye; Palebelly (young); Whistling field plover.

Tringa squatarola Linne, Syst. nat., ed. 10, 1758, vol. 1, p. 149. "IN EUROPA."

Vt.—Rare migrant: Lunenburg; Middlebury.

Mass.—Common migrant coastwise. April 15–June 13 (June 25); July 8–Nov. 16 (Dec.).

Conn.—Common migrant coastwise.
FAUNA OF NEW ENGLAND.

LIMICOLAE.

CHARADRIIDAE.

164. Charadrius dominicus Müller.

American golden plover; Bullhead; Frost-bird; Greenback; Greenhead; Green plover; Muddy breast; Pale belly; Pale breast; Three toes; Toad-head.

Beaches, marshes, and open hilltops; nests on the ground.

Me.—Formerly common, now rare fall migrant coastwise. Aug. 12–Nov. 15.

N. H.—Rare migrant coastwise. (May); Aug. 26–mid-Oct.

Vt.—Rare migrant: Lunenburg.

Mass.—Very rare spring, and formerly common but now rare fall migrant coastwise. (May); Aug. 12–Nov. 2 (Nov. 19; Nov. 25, 1908, Ipswich).

R. I.—Migrant, formerly rare in spring and common in fall coastwise; now very rare. (May); Aug. 14–Oct. 25.

Conn.—Formerly common migrant, now rare; mainly coastwise. Oct. 24.

165. Oxyechus vociferus (Linné) Reichenbach.

Killdeer.

Meadows, fields, and marshes; less often on beaches; nests on the ground.

LIMICOLAE.

CHARADRIIDAE.

N. H.—Rare migrant and accidental winter resident (1888–89); formerly rare summer resident.

Vt.—Rare migrant and summer resident (Lake Champlain).

Conn.—Rare migrant and summer resident, formerly more plentiful. (Feb. 24) late Mar.–May; summer. Eggs, June 6.

166. Aegialitis semipalmata (Bonaparte) Bonaparte.

Semipalmated plover; Little ring-neck; Ring-neck.

Sandy beaches and salt-marsh flats; nests on the ground.

Me.—Common migrant; mainly coastwise. May–(June 22); July 29–Sept.

N. H.—Common migrant, mainly coastwise.

Vt.—Rare migrant.

Mass.—Common migrant, mainly coastwise. Late April–June 14 (June 26); July 12–Oct. 28.

167. Aegialitis meloda (Ord) Bonaparte.

Piping plover; Clam-bird; Mourning-bird; Pale ring-neck; Ring-neck.

Charadrius melodus Ord, Wilson’s Amer. ornith., 1824, vol. 7,
LIMICOLAE.

CHARADRIIDAE.

Sandy beaches; nests on the ground.

Me.—Formerly a rare summer resident coastwise (Wells Beach).
May 2–Aug.

N. H.—Rare migrant coastwise.

Vt.—Doubtfully recorded.

Mass.—Uncommon migrant and summer resident coastwise.
R. I.—Uncommon migrant and summer resident coastwise.

Conn.—Uncommon migrant and summer resident coastwise.

168. Ochthodromus wilsonius (Ord) Reichenbach.

Wilson's plover.

Sandy beaches and mudflats; nests on the ground.

Vt., N. H.—Doubtfully recorded.

R. I.—Doubtfully included.

Conn.—Accidental visitor: Bridgeport, July 28, 1888 ("seen," Averill); Stratford (Linsley).

APHRIZIDAE.

169. Arenaria interpres (Linné) Vieillot.

European turnstone; Tangle-picker.

"In Europa & America septentrionali."
LIMICOLAE.

APHRIZIDAE.

*Strepsilas interpres* (Linne). Dresser, Birds of Europe, 1871–81, vol. 7, p. [555], pl. [532].

Seacoasts; nests on the ground.

Mass.—Accidental visitor: Monomoy Island, Sept. 8, 1892, (Bishop).

Ruddy turnstone; Bead-bird; Brant-bird; Calico-back; Calico-bird; Chicken plover; Horsefoot snipe; Rock-bird; Rock plover; Stone plover; Turnstone.

Seacoasts; nests on the ground.

N. H.—Uncommon migrant.

VT.—Rare migrant: Lake Champlain.

Mass.—Uncommon migrant. May 1–31 (June 24); July 25–Oct. 16.

Conn.—Common migrant. May 23; Aug.–Sept.

HAEMATOPOIDIDAE.

171. *Haematopus palliatus* Temminck.

American oyster-catcher.

Seacoasts; nests on the ground.
LIMICOLAE.

HAEMATOPODIDAE.

Me.—Formerly at Portland (Audubon).
Mass.—Now an accidental visitor. Late April; Aug.
Conn.—Now very rare migrant; formerly more plentiful.

GALLINAE.

TETRAONIDAE.

172. COLINUS VIRGINIANUS (Linné) Stejneger.

Bob-white; Quail; Virginia partridge.

Egg, Bendire, 1892, vol. 1, pl. 1, fig. 1.

"America."

Weedy and brushgrown fields and edges of woods; nests on the ground.

Me., N. H.—Formerly common, now rare resident in southern counties; also introduced from the South.

Vt.—Rare resident at lower elevations; largely introduced.

Mass.—Uncommon resident; also introduced. Eggs, May–June 30 (Sept.).

R. I.—Common resident; also frequently introduced. Eggs, May 25–June 20 (Oct. 10).

Conn.—Common resident, also introduced. Eggs, June 14–Aug. (Sept. 2).

173. CANACHITES CANADENSIS CANACE (Linné) Norton.

Canadian spruce grouse; Black grouse; Fool-hen; Spotted grouse; Spruce partridge; Wood partridge.

"Canada."

GALLINAE.

TETRAONIDAE.

Dense fir and spruce woods; nests on the ground.

Me.— Uncommon resident in northern forests. Eggs, May.

Vt.— Uncommon resident in northernmost part (Victoria).

Mass.— Accidental visitor: Gloucester, Sept. 1851; Roxbury Nov. about 1865.

Ruffed grouse; Birch partridge; Partridge; Pheasant.

Woods and thickets; nests on the ground.

Vt.— Nearly typical birds rarely found in south part; resident. Mass.— Uncommon resident. Eggs, April 27–June 2.

Conn.— Common resident. Eggs, April 21–May 20.

175. Bonasa umbellus togata (Linné) Ridgway.

Canadian ruffed grouse; Partridge; Pheasant.

Woods and thickets; nests on the ground.

Me.— Common resident. Eggs, April 27–May 25.

N. H.— Common resident up to tree limit on mountains.

Vt.— Common resident.
FAUNA OF NEW ENGLAND.

GALLINAE. PHASIANI.

TETRAONIDAE.

Mass.—Resident; nearly typical birds occur in Berkshire Co. (North Adams).

176. **Lagopus lagopus** (Linné) Stejneger.

**Willow ptarmigan.**

Dense thickets; nests on the ground.

Me.—Accidental visitor: near Dennisville (Audubon); Kenduskeag, April 23, 1892.

Mass.—Accidental visitor (or escape): Manchester, May 10, 1859.

R. I.—Doubtfully recorded.

177. **Tympanuchus cupido** (Linné) Ridgway.

**Heath-hen; Eastern pinnated grouse; Hethen.**

*Cupidonia cupido* Brewster, Auk, 1885, vol. 2, p. 82. Egg, Bendire, 1892, vol. 1, pl. 3, fig. 2.

Scrub-oak thickets; nests on the ground.

Me.—Ascribed by Audubon to Maine, but perhaps erroneously.

Mass.—Resident, now confined to Martha’s Vineyard, but (till about 1815) occurring coastwise nearly to Boston, and in lower Connecticut valley. Eggs, June 2–July 24.

R. I.—Formerly common, but practically extirpated by 1800.

Conn.—Formerly common; extirpated before 1840 (Westford, about 1832, Nuttall).

**Wild turkey.**

Woods and thickets; nests on the ground.

Me.— Formerly a resident in southern counties (to Mt. Desert?); now extirpated.

N. H.— Formerly a resident in southern part; last record in 1841 or '42.

Vt.— Formerly resident in southern part; now extirpated.

Mass.— Formerly common resident; last recorded capture at Mt. Tom, winter of 1850–51.

R. I.— Formerly common resident.

Conn.— Formerly common resident; last killed about 1813 on Totoket Mt., Northford.

COLUMBIAE.

**Passenger pigeon; Wild pigeon.**

Woods and fields; nests in trees in colonies.

Me.— Formerly an abundant migrant and local summer resident; last specimens taken near Dexter, Aug. 16, 1896, and at Bar Harbor, early summer 1904. April 7–Sept.
COLUMBAE.

FAUNA OF NEW ENGLAND.

COLUMBIDAE.

N. H.— Formerly abundant migrant and local summer resident; last specimen taken at Concord, 1885. April 2–18; summer–Oct. 10.

Vt.— Formerly abundant migrant and summer resident. Mar. 20–Oct. 10.

Mass.— Formerly abundant migrant and common local summer resident, rare in winter; last recorded in 1889. Mar. 10–Oct. 21 (winter). Eggs, May 22.

R. I.— Formerly abundant migrant; last killed in 1886.

Conn.— Formerly an abundant migrant, and common summer resident. April 2–fall. Eggs, late May.

180. ZENAIDURA MACROURA CAROLINENSI(S (LINNÉ) A. O. U. comm.

Mourning dove; Carolina dove; Long-tailed dove; Turtle dove.

Columba carolinensis Linné, Syst. nat., ed. 12, 1766, vol. 1, p. 286. "In America."

Open woods and fields; nests in trees, or rarely on the ground.

Me.— Rare migrant and summer resident in southern part; accidental in winter. Mar. 21–Oct. 24 (Nov. 21 and winter).

N. H.— Rare migrant and summer resident in southern part. Late Mar.–Oct. (Dec. 15).

Vt.— Rare summer resident: Rutland Co.

Mass.— Uncommon migrant and summer resident; rare winter resident. Mar. 5–Nov. 15 (winter). Eggs, April 19–May 20.

COLUMBAE.  

COLUMBIDAE. 

181. **Starnoenas cyanocephala** (Linné) Bonaparte. 

**Blue-headed quail-dove.**

Thickets and woods; nests among vines.

Mass.—One taken at Brookline, Oct. 10, 1870, probably an escape.

RAPTORES.  

CATHARTIDAE.  

182. **Cathartes aura septentrionalis** (Wied) Nelson. 

**Turkey vulture; Turkey buzzard.**

Open country; nests on ground in shallow caves or in hollow logs.

ME.—Accidental visitor at all seasons (eight records). 

N. H.—Accidental visitor: Hampton Falls, April 1882; North Weare, spring 1887. 

Vt.—Accidental visitor: Eutaw. 

Mass.—Occasional visitor at all seasons. 

R. I.—Occasional visitor; four records. May 10–Nov. 

Conn.—Occasional (mainly summer) visitor. April 20–Oct. 18.

183. **Catharista urubu** (Vieillot) Vieillot. 

**Black vulture; Black-headed buzzard; Carrion crow; Jim crow.**

RAPTORES.  

CATHARTIDAE.  

p. 23, pl. 2. "L'Amérique, depuis la Nouvelle-Ecosse jusqu'à la Terre de Feu."

Open country and vicinity of dwellings; nests on the ground.

ME.—Accidental visitor. Aug. 20–Nov. 3.

VT.—Accidental visitor: Lunenburg; Woodbury, July 10, 1884.

CONN.—Accidental visitor: East Lyme, July 6, 1901.

FALCONES.

*Swallow-tailed kite.*

Open country; nests in tall trees.

ME.—Erroneously recorded.

N. H.—Doubtfully recorded (Franklin, 1875).

VT.—Doubtfully recorded (Williams).

MASS.—Accidental visitor: Amesbury (= West Newbury) about Sept. 25, 1882; Whately; (?) near Northampton, 1880.

CONN.—Accidental visitor: Lyme, July 2, 1877; Portland, summer 1861; Saybrook, June 16, 1889.

185. *Circus hudsonius* (Linné) Vieillot.

*Marsh hawk; Blue hawk; Bog-trotter; Frog hawk; Harrier; Mole hawk; Mouse hawk; Mouser; Snake hawk.*

AVES.

RAPTORES.

FALCONIDAE.

Falco hudsonius Linné, Syst. nat., ed. 12, 1766, vol. 1, p. 128. “AD FRETUM HUDSONIS.”

Open country, fields, marshes; nests on the ground.

Vt.—Uncommon summer resident. April 14–Oct.

Mass.—Common migrant, uncommon summer resident; rare winter resident on the coast. Mar. 1–Nov. 29 (winter). Eggs, May 12–June 8.

Conn.—Common migrant, uncommon summer resident; winters rarely. Mar.–Nov. 6 (winter). Eggs, May 9–June 9.

186. Accipiter velox (Wilson) Vigors.

Sharp-shinned hawk; Pigeon hawk.

Open or wooded country; nests in trees.

ME.—Common migrant, less common summer resident; rare winter resident (Portland, 1905; Westbrook, 1907). Mar. 27–Nov. 23 (winter). Eggs, June 1.

N. H.—Common migrant, less common summer resident; rare winter resident in southern part. Eggs, May 23–June 1.

Vt.—Uncommon summer and rare winter resident.

RAPTORES.

FALCONIDAE.

187. Accipiter cooperii (Bonaparte) Gray.

Cooper’s hawk; Chicken hawk.

Open country and woods; nests in trees.

Vt.— Uncommon migrant and summer resident; (? winter). Eggs, April 22.

Mass.— Uncommon migrant and summer resident; rare in winter. Eggs, April 25–June 11.

R. I.— Common migrant, less common summer resident; probably winters rarely. Eggs, May 12–14.

Conn.— Common migrant, less common summer and winter resident. Eggs, April 25–June 18.

188. Astur atricapillus (Wilson) Bonaparte.

American goshawk; Blue hawk; Partridge hawk.

Falco atricapillus Wils., Amer. ornith., 1812, vol. 6, p. 80, pl. 52, fig. 3. *near Philadelphia.*

Accipiter atricapillus (Wils.). Chapman, Handb. birds east.
AVES.

RAPTORES.

FALCONIDAE.

FALCONES.

Open country and heavy woods; nests in trees.

ME.— Common winter resident, less common summer resident. Oct. 26–May; summer. Eggs, April 25–May.

N. H.— Irregularly common winter resident; rare summer resident south to Alstead.

Vt.—Irregular winter visitor; rare summer resident south to Rutland, Mendon. Eggs, April 23–May 1.

Conn.—Irregular winter visitor, sometimes common; accidental in late summer. (Aug. 24, 1893, West Haven) Oct. 2–winter.

189. Buteo borealis (Gmelin) Vieillot.

Red-tailed hawk or buzzard; Hen hawk.

Open country and forests; nests in large trees.

ME.—Uncommon summer resident, and in southern counties rare winter resident. Eggs, May 6–26.

N. H.—Uncommon resident, wintering from White Mts. south.

Vt.—Uncommon resident. Eggs, April 22.

Mass.—Uncommon migrant and winter resident; rare summer resident. Eggs, April 6–27.

FAUNA OF NEW ENGLAND.

RAPTORES.

FALCONIDAE.

CONN.—Uncommon migrant and winter resident; rare summer resident. Sept.–Mar.; summer. Eggs, Mar. 28–April 24 (May 25).

190. Buteo lineatus (Gmelin) Vieillot.

Red-shouldered hawk; Chicken hawk; Hen hawk; Winter hawk.

Open country and woods; nests in large trees.

N. H.—Uncommon summer resident north to southern valleys of White Mts. Mar. 27–Nov.

CONN.—Common migrant and winter resident, less common summer resident. Eggs, April 5–June 1.

191. Buteo swainsoni Bonaparte.

Swainson's hawk.

RAPTORES.

FALCONIDAE.

Open prairie country or edges of woods near streams; nests in trees.

ME.—Occasional visitor from West. May 19; Sept. 15, Oct. 8.
VT.—Rare visitor: Lunenburg.
Mass.—Rare visitor (four records). April 20–Nov. 7.

192. Buteo platypterus (Vieillot) Faxon.

Broad-winged hawk.

Woodlands, and along streams; nests in trees.

VT.—Uncommon summer resident. April 14–fall.
Conn.—Uncommon migrant, and rare summer (and ? winter) resident. Eggs, May 3–18.

193. Archibuteo lagopus sancti-johannis (Gmelin) Coues.

American rough-legged hawk; Black hawk.

RAPTORES.

FALCONIDAE.

Open country; nests on cliffs or in trees.

**Me.**—Uncommon fall and winter visitor. Oct. 28–Mar.

**N. H.**—Uncommon irregular fall and winter visitor. Oct.–(May 6).

**Vt.**—Rare fall and winter visitor. Oct.

**Mass.**—Rare fall and winter visitor. Oct.–April 13 (May 8).

**R. I.**—Uncommon fall and winter visitor. Oct.–April 12.

**Conn.**—Fall and winter visitor, irregular, but sometimes common. Nov. 20–April.

194. *Aquila chrysaetos* (Linné) Sprüngli.

Golden eagle; Ring-tailed eagle.

Mountainous country; nests on cliffs or in large trees.

**Me.**—Rare visitor; not now known to breed (young (?), Sandy Bay Mt., 1895).

**N. H.**—Rare visitor; formerly rare resident in White Mts.

**Vt.**—Rare visitor; formerly a resident.

**Mass.**—Rare visitor at all seasons, not now known to breed.

**R. I.**—Rare visitor in fall and winter.

**Conn.**—Rare visitor, at all seasons.

Bald eagle; Gray eagle; Washington eagle (young); White-headed eagle.

Chapman, Handb. birds east. No. Amer., 1895, p. 207; A. K.
RAPTORES.

FALCONIDAE.

"in America, Europe."

Open wild country, especially near lakes and seacoasts; nests in tall trees or on the ground.

Me.— Uncommon migrant and summer resident; less common winter resident coastwise. Eggs, April 4–21.

N. H.— Uncommon migrant and summer resident; rare in winter in southern part.

Vt.— Uncommon migrant and summer resident.

Mass.— Uncommon migrant and, near coast, occasional at all seasons. No recent breeding records (formerly on Mt. Tom).

R. I.— Occasional at all seasons, though not known to breed.

Conn.— Occasional at all seasons, but most frequent as a migrant; formerly bred (Mt. Carmel, Saltonstall Ridge, West Peak).

196. _Falco islandus_ Brünnich.

**White gyrfalcon; White or Speckled hawk.**

Brünn., Ornith. borealis, 1764, p. 2. "ISLANDIA."

Open country and barrens; nests on sea cliffs.

Me.— Accidental visitor: South Winn, Oct. 8, 1893; (nee Cape Elizabeth).

N. H.— Doubtfully recorded (Errol, Nov. 4, 1868, Maynard).

Mass.— Doubtfully recorded (Cambridge, Jan.–Feb., 1833, Nuttall).

197. _Falco rusticolus_ Linné.

**Gray gyrfalcon.**

FAUNA OF NEW ENGLAND.

RAPTORES.

FALCONIDAE.

Open country; nests on cliffs.

ME.— Accidental visitor: Cape Elizabeth, Oct. 13, 1877.

198. Falco rusticolus gyrfalco (Linné) Stejneger.

Gyrfalcon; MacFarlane’s gyrfalcon.

Open or mountainous country; nests on cliffs.

VT.— Doubtfully recorded.

MASS.— Very rare winter visitor: Melrose, Jan. 1, 1891; Northampton, Feb., 1880; Stowe, 1881.

199. Falco rusticolus obsoletus (Gmelin) Stejneger.

Black gyrfalcon; Labrador gyrfalcon.

Open and mountainous country; nests on cliffs or rarely in trees.

ME.— Rare fall and winter visitor. Sept.–Mar. 22.

N. H.— Rare winter visitor: Milford, January, 1891.
RAPTORES.

FALCONIDAE.

Mass.—Rare fall and winter visitor (four records). Oct.—Mar. 11.

200. Falco peregrinus anatum (Bonaparte) Blasius.

Duck hawk; American peregrine falcon; Black hawk (Vt.); Bullet hawk; Great-footed hawk; Ledge hawk.

Open and mountainous country; nests on ledges or in cavities of large trees.

Mass.—Rare migrant, and in western mountains, rare local summer resident; rare in winter. Eggs, April 15–May 23.
R. I.—Rare migrant. May; Oct.
Conn.—Rare migrant, summer and winter resident. Eggs, May 9 (large young, May 25, Talcott Mt.).

201. Falco columbarius Linné.

Pigeon hawk.

Woods and open country; nests in low trees.
RAPTORES.

FALCONIDAE.

Me.—Uncommon migrant, rare in winter and summer; probably breeds in northern counties (fledglings noted, Knight). Mar. 28–May 13; (summer; Sept.–Oct. 10 (Dec. 1, 1906, Westbrook; Feb. 22, 1907, Scarborough).

Vt.—Uncommon migrant; doubtfully recorded in summer.

Mass.—Uncommon migrant and rare winter resident. April 10–May 16; Sept. 7–Nov. 24; winter.

R. I.—Uncommon migrant, mainly in fall, and rare winter resident. April 24–May; Sept. 3–Nov. 21 (Jan.).

Conn.—Uncommon migrant and rare winter resident; doubtfully recorded in summer. April; (? Aug.); Sept. 25–Nov.; winter.

Kestrel.

Open and wooded country; nests in dense woods, on cliffs, or in towers of buildings.

Mass.—Accidental visitor from Old World: Nantasket Beach, Sept. 29, 1889.

203. Falco sparverius Linné.

American sparrow hawk; Killyhawk; Pigeon hawk.

Open country; nests in cavities of trees or rarely of buildings.

Me.—Uncommon migrant and summer resident; rare winter

Vt.—Uncommon migrant and summer resident. Mar. 21–fall.

Mass.—Uncommon migrant and summer resident; uncommon winter resident near coast. Eggs, April 27–May 26.

Conn.—Uncommon resident. Eggs, April 26–May 7.

204. Pandion haliaetos carolinensis (Gmelin) Ridgway.

American osprey; Fish hawk.

Seacoasts and vicinity of large streams and lakes; nests in high or low trees, on rocks or artificial sites.

N. H.—Uncommon migrant; formerly bred at Lake Umbagog. April; Aug.–Nov. 1.

Vt.—Uncommon migrant.

Mass.—Common migrant, and in Bristol Co. a summer resident. (Mar. 16) April 2–May 29; summer; Aug. 26–Nov. 11. Eggs, May 8–July.

205. Aluco pratincola (Bonaparte) A. O. U. comm.

American barn owl; Monkey-faced owl.

Open country, hiding in hollow trees and cavities during the day; nests in hollow trees, burrows, cavities in cliffs or buildings.

ME.—Erroneously recorded from Falmouth.
VT.—Accidental visitor: Danby, 1902; Lyndon, June 4, 1894.
MASS.—Rare visitor. May–Dec.
RI.—Rare visitor; five records.
CONN.—Rare visitor. June 11–Oct. 28.

STRIGIDAE.

American long-eared owl; Cat owl.

Dense woods and swamps; nests in trees, usually in old crow or hawk nests.

MASS.—Uncommon fall and winter visitor, rare summer resident. Eggs, April 1–May 14.
RI.—Rare resident. Eggs, April 10.
CONN.—Uncommon resident. Eggs, early April–April 25.
AVES.

RAPTORES.

STRIGIDAE.

**Short-eared owl; Bog owl; Gray marsh owl; Marsh owl.**

*Strix flammea* Pontopp., Danske atlas, 1763, vol. 1, p. 617, pl. 25. Based on Linné: [Sweden].

Open country and marshes; nests on the ground.

**ME.**—Uncommon resident, more common migrant near coast.

**N. H.**—Uncommon migrant. April; Nov.

**VT.**—Uncommon migrant (? winters).

**Mass.**—Uncommon migrant mainly near coast, rare in winter; rare summer resident. Mar. 15–April 15; summer; Sept. 24–Nov. 30 (winter).

**R. I.**—Uncommon migrant and rare summer resident; may winter rarely. April; Oct. 26–Dec. 23. Eggs, April 28.

**Conn.**—Uncommon migrant; rare summer and winter resident.

208. *Strix varia* Barton.

**Barred owl; Barn owl (Me.); Black-eyed owl; Hoot owl; Round-headed owl.**

Heavy woods, preferably near water; nests in hollows of trees or in abandoned hawk or crow nests.

**ME.**—Rather common resident. Eggs, Mar. 27.

**N. H.**—Rather common resident up to 3000 feet.

**VT.**—Rather common resident.
RAPTORES. STRIGIDAE. STRIGES.

Mass.—Uncommon resident, more frequent in fall migration. Eggs, Mar. 27–May 13.

N. H.—Common resident up to 4500 ft.
Vt.—Uncommon resident. Eggs, June 8.
Mass.—Uncommon winter visitor and less common summer resident, especially in western part. Eggs, April 22–May 30.
Conn.—Uncommon fall and winter visitor, rare summer resident. Eggs, May 2–9.

223. Dryobates pubescens medianus (Swainson) Brewster.

Downy woodpecker; Little guinea woodpecker; Little sapsucker.

Open woods, shade and orchard trees; nests in holes excavated in dead trees.

Me.—Common resident. Eggs, May 27.
N. H.—Common resident, mainly below 3000 ft.
Vt.—Common resident.
PICIDAE.

R. I.—Uncommon summer and common winter resident. Eggs, May 12–25.

Conn.—Common resident.

224. Picoides arcticus (Swainson) Gray.

Arctic three-toed woodpecker; Black-backed three-toed woodpecker.

Evergreen forests; nests in holes excavated in dead trees.

Me.—Uncommon winter visitor, and in northern and western counties, rare resident. Eggs, May 23.

N. H.—Rare resident above 3000 ft. in White Mts., south to Mt. Passaconaway and possibly on Mt. Monadnock (Keene, breeding), elsewhere rare visitor.

Vt.—Rare resident in northern part and on higher peaks (nests at Burlington, Lunenburg, Sherburne, Pico Peak, etc.); occasional visitor to lower country in fall and winter. Eggs, May 29, June 1.

Mass.—Occasional fall and winter visitor. (Late Sept.) Oct. 16–April 27 (July, 1888, Boxford; Aug. 11, 1883, Dorchester).

Conn.—Rare winter visitor: East Windsor Hill; Simsbury, 1860.

225. Picoides americanus Brehm.

American three-toed woodpecker; Banded-backed woodpecker; Ladder-backed woodpecker.

AVES.

PICIDAE.

Evergreen forests; nests in holes excavated in dead trees.

ME.—Rare winter visitor, and in north and west, a rare resident. Eggs, June 2.

N. H.—Rare resident above 3000 ft., south to Sandwich range; elsewhere rare winter visitor. Eggs, June 4.

Vt.—Rare winter visitor and local resident (*Pico Peak* above 2500 ft.).

Mass.—Rare winter visitor. April 28.

**Yellow-bellied sapsucker; Red-throated sapsucker; Squealing or Whining woodpecker.**

Woods, orchards, and shade trees; nests in holes excavated in dead trees.

N. H.—Common migrant and in northern half a common summer resident up to 3000 ft.; accidental winter resident (Charlestown, 1808–99). April 14—Oct. 20 (winter).

Vt.—Common migrant, less common summer resident.

Mass.—Uncommon migrant and accidental winter resident; in Berkshire Co. a rare summer resident. April 4—May 10; summer; Sept. 10—Nov. 1 (winter).

Conn.—Rare spring and uncommon fall migrant. Mar. 30—May 3; Sept. 28—Oct. (Dec. 21, 1908, New Haven).
PICI.

PICIDAE.

227. _Phloeotomus pileatus abieticola_ (Bangs) A. O. U. comm.  
    Northern pileated woodpecker; Black woodpecker; Cock of  
    the woods; Laughing woodpecker; Logcock; Stump-breaker;  
    Woodchuck; Woodcock; Woodhen.

"Greenville, Maine."

pl. 18, fig. 35. Egg, Capen, 1886, pl. 14, fig. 6.  
    Heavy timber; nests in holes excavated in dead trees.

Me.—Uncommon resident in wilder portions. Eggs, May 11–  
    May 28.

N. H.—Rare resident mainly in northern and western parts.  
Vt.—Rare resident, breeds south to Taftsville, Townshend,  
    Wells River. Eggs, May 22.

Mass.—Rare resident in western counties; elsewhere casual.  
    Eggs, May 17.

Conn.—Rare or now an accidental visitor (Granby, Nov. 1,  
    1890, 1894–95; Litchfield, June 20, 1908).

228. _Melanerpes erythrocephalus_ (Linné) Swainson.  
    Red-headed woodpecker.

274, pl. 271. Egg, Capen, 1886, pl. 14, fig. 14.  
    Open woodlands and shade trees; nests in holes excavated in  
    dead trees.

Me.—Occasional visitor, mainly in spring and fall; said to  
    have bred in York Co.

N. H.—Rare and irregular visitor in southern half. May 25–  
    Sept.

Vt.—Irregular visitor at all seasons, sometimes common; resi-  
    dent and bred in western part about 1880 (Orwell, Rutland).
PICI.

PICIDAE.

Mass.—Rare irregular visitor at all seasons, sometimes breeding (Agawam, Brookline, Newton). Eggs, May–June 17.

Conn.—Rare summer resident and irregular visitor at all seasons; formerly more common.

229. **Centurus carolinus** (Linné) Bonaparte.

**Red-bellied woodpecker.**

Wooded bottomlands; nests in holes excavated in dead trees.

Mass.—Accidental visitor (five records). May–Nov.

R. I.—Accidental visitor: near Providence, two specimens.

Conn.—Accidental visitor: Hartford; Stratford, Oct. 16, 1842. Suffield, July 30, 1874.

230. **Colaptes auratus luteus** Bangs.

**Northern flicker; Anteater; Clape; Golden-winged woodpecker; Grasshopper woodpecker (Vt.); Harry wicket; High-hole; Pigeon woodpecker; Wake-up; Yaffle; Yellow jay; Yellow-hammer; Yellow-wing (Mass.); Yucker.**

Open woods, orchards, fields, clearings; nests in holes excavated in dead trees, or in cavities.

PICI.

**PICIDAE.**

Vt.— Common migrant and summer resident. April 18–fall.

Mass.— Common migrant and summer resident; less common winter resident, mainly near coast. Eggs, May 6–June 20.

Conn.— Common migrant and summer resident; less common winter resident. Mar. 28–Nov. 28; winter. Eggs, May 18–June 9.

MACROCHIRES.

**CAPRIMULGIDAE.**

231. **Antrostomus carolinensis** (Gmelin) Gould.

*Chuck-will’s-widow.*

Woods and thickets, active at night; nests on the ground.

Mass.— Accidental visitor: Revere (Oct. or Dec.), 1884.

Conn.— Accidental visitor: New Haven, May 19, 1889 (after southerly storm).

232. **Antrostomus vociferus** (Wilson) Bonaparte.

*Whip-poor-will.*

Woods and thickets, active at night; nests on the ground.

Me.— Common summer resident. April 28–Sept. 21.
AVES.

MACROCHIRES.

CAPRIMULGIGAEO.

Conn.—Common summer resident. Late April–Sept. (Nov. 1, 1880, Noank). Eggs, May 20–June 5 (July 4).

233. **Chordeiles virginianus** (Gmelin) Swainson.

**Nighthawk; Bull-bat; Mosquito hawk; Pork-and-beans.**

Woods, thickets, or in cities and open country; nests on the ground or on flat gravelled roofs; largely nocturnal.

Vt.—Common migrant and summer resident. May–Sept.

R. I.—Common migrant (mainly inland), and summer resident. (April 7) May–Sept. (Oct.) Eggs, June 5–8.

234. **Chaetura pelagica** (Linné) Stephens.

**Chimney swift; Chimney-bird; Chimney swallow.**

Chapman, Handb. birds east. No. Amer., 1895, p. 239; Bird-life, 1898, pl. 28. Egg, Bendire, 1895, vol. 2, pl. 1, fig. 25.

Lives largely on the wing; rests and nests in hollow trees, chimneys, or barns.

**N. H.—** Common summer resident. April 27–Sept. 7 (Oct. 1).

**Vt.—** Common summer resident. May 1–Sept.

**Conn.—** Common summer resident. (April 14) April 21–Sept. 27. Eggs, June 24.

235. **Trochilus columbris** Linné.

**Ruby-throated hummingbird.**

Open country, haunting flower growths; nests in trees.

**Me.—** Common summer resident. May 6–Sept. 26 (Oct. 1).

**Vt.—** Uncommon summer resident. May 15–Sept.
MACROCHIRES.  

TROCHILIDAE.  

PASSERES.  

CLAMATOURES.  

236. Muscivora forficata (Gmelin) Oberholser.  

Scissor-tailed flycatcher.  

Open tree-grown country; nests in trees. 

CONN.—Accidental visitor: Wauregan, about April 27, 1876.

237. Tyrannus tyrannus (Linné) Jordan.  

Kingbird.  

Orchards and tree growth along streams and lakes; nests in trees. 

N. H.—Common summer resident north to the White Mt. valleys. May 3–Sept. 11. 

VT.—Common summer resident. May 5–Sept. 

PASSERES. CLAMATORES.

TYRANNIDAE.

Conn.—Common summer resident. (April 13, 26) May 1–Sept. 15.

238. **Tyrannus dominicensis** (Gmelin) Richardson.

*Gray kingbird.*

Tree growth along seacoasts and large streams; nests in low trees.

Mass.—Accidental visitor: Lynn, Oct. 23, 1869.

239. **Tyrannus verticalis** Say.

*Arkansas kingbird.*

Open country, usually near water; nests in trees.

240. **Myiarchus crinitus** (Linné) Lichtenstein.

*Crested flycatcher; Great crested flycatcher.*

Open woods; nests in hollow limbs.
Sayornis phoebe (Latham) Stejneger.

**Phoebe; Barn, Bridge, or House pewee; Bridge-bird; Pewit.**

*Muscicapa fusca* Bonap. Audubon, Ornith. biogr., 1834, vol. 2, p. 122, pl. 120.

Borders of streams and ponds, or about buildings; nests under bridges or culverts, or on projections of buildings or ledges.

VT.— Common summer resident. Mar. 22-fall.

FAUNA OF NEW ENGLAND.

PASSERES.

TYRANNIDAE.

242. Sayornis saya (Bonaparte) Baird.

Say's phoebe.

*Muscicapa saya* Bonap., Amer. ornith., 1825, vol. 1, p. 20, pl. 2, fig. 3. "Near the Arkansaw river, about twenty miles from the Rocky Mountains." Egg, Bendire, 1895, vol. 2, pl. 1, fig. 29.

Open country; nests under bridges, projections of buildings and ledges.

Mass.—Accidental visitor: North Truro, Sept. 30, 1889.

243. Nuttallornis borealis (Swainson) Oberholser.

Olive-sided flycatcher; Three-deer.

Mixed and coniferous woods; nests in trees.

Me.—Uncommon summer resident, south to Cape Elizabeth. May 7–Sept. 15. Eggs, June 17–23.

Vt.—Uncommon summer resident, mainly of mountainous regions. May 10–fall. Eggs, June 10–16.

R. I.—Rare migrant. May 14–24; ? fall.

Conn.—Rare migrant; may breed in northwestern part. Spring; Aug. 5–Oct. 18.
244. *Myiochanes virens* (Linne) Ridgway.

**Wood pewee; Dead-limb bird.**

Me.—Common summer resident. May 12–Sept. 27. Eggs, June 20.

Vt.—Common summer resident. May 19–Sept.

Conn.—Common summer resident. May 10–Sept.

**Yellow-bellied flycatcher.**

PASSERES.

CLAMATORIDAE.

Vt.—Uncommon local summer resident at lower elevations south to Londonderry. May 16–summer.

Mass.—Rare migrant and possible summer resident on Mt. Greylock (June 15, 1907). (May 10) May 15–June 10 (June 15); Aug. 25–Sept. 10 (Nov. 29, 1876, Reading; Dec. 1, 1876, Newton).

Conn.—Uncommon migrant. May 20–early June; Sept. 17.

246. Empidonax virescens (Vieillot) Brewster.

**Green-crested flycatcher; Acadian flycatcher.**

Deep woods near water; nests, pensile, in low trees.

Vt.—Rare summer resident: Bennington (nest with young, July 14, 1904); various doubtful records.

Mass.—Very rare summer resident (Hyde Park, 1888; née Springfield).

Conn.—Rare local summer resident (Greenwich, Stamford, Suffield). Eggs, June 2–22.

247. Empidonax traillii alnorum Brewster.

**Alder flycatcher; Traill's flycatcher.**

Alder swamps; nests in low bushes.

Me.—Common local summer resident. (May 15) May 18–Sept. 5. Eggs, June 21.
PASSERES.

TYRANNIDAE.

Conn.—Local summer resident (Norfolk). (May 6).

248. Empidonax minimus (Baird) Baird.

Least flycatcher; Chebec.

Orchards, shade trees, and borders of woods; nests in trees.

Me.—Common summer resident. (April 21) April 27–Aug. 31 (Sept. 5). Eggs, June 11.

Vt.—Common summer resident of low country. April 29–Sept.

R. I.—Common summer resident. (April 22) April 27–fall.

Conn.—Common summer resident. April 26–Sept.
249. Otocorisa alpestris (Linne) Bonaparte.

**Horned lark; Shore lark.**

Ridgway, Bull. 50, U. S. nat. mus., 1907, pt. 4, p. 303; Chapman, Bird-life, 1898, pl. 34. Egg, Seebohm, 1896, p. 259, pl. 58, fig. 15.

Seashores and open fields; nests on the ground.

Me., N. H.—Common migrant and winter resident, chiefly coastwise. (Sept. 25, Milo, Me.) Oct. 18—April (May 1–7, Monson, Me.).

Vt.—Common migrant. Feb.–Mar.; (Sept. 15)—Nov.

Mass.—Common migrant, less common winter resident, mainly coastwise. (Sept. 27) Oct. 17—April 19 (May 27).

R. I.—Common migrant and winter resident. (Sept. 25)—April 15.

Conn.—Common migrant and winter resident, mainly coastwise. Nov. 18–Mar. 26.

250. Otocorisa alpestris praticola Henshaw.

**Prairie horned lark.**

Open fields; nests on the ground.

PASSERES.

ALAUDIDAE.

Vt.— Uncommon migrant and rare summer resident (at Burlington, Cornwall, Mt. Mansfield, Rygate, St. Albans, Stowe). Feb.–fall. Eggs, Mar.–April 19.

R. I.— Rare migrant: Pawtuxet, Nov. 25, 1889.

Conn.— Uncommon migrant and summer resident (Danbury, 1908, Litchfield, 1905, Washington, 1906); “occasional in winter.” Eggs, Mar. 25.

251. Otocoris alpestris hoyti Bishop.

Hoyt’s horned lark.

Bishop, Auk, 1896, vol. 13, p. 130. “CANDO, TOWNER COUNTY, NORTH DAKOTA.”

Open country and coasts; nests on the ground.

Conn.— Rare migrant and (?) winter resident: Guilford, Mar. 7, 1903; West Haven, Jan. 24, 1905 (Bishop).

CORVIDAE.

252. Cyanocitta cristata (Linné) Strickland.

Blue jay; Corn-bird.

Corvus cristatus Linné, Syst. nat., ed. 10, 1758, vol. 1, p. 106. “IN AMERICA SEPTENTRIONALI.”

PASSERES.

CORVIDAE.

N. H.—Common migrant and summer resident; less common in winter south of the White Mts.

Vt.—Common migrant and resident. Eggs, May 11.

253. **Perisoreus canadensis** (Linné) Bonaparte.

*Canada jay; Camp robber; Caribou-bird; Gray jay; Grease-bird; Meat-bird; Meat hawk; Moose-bird; Venison hawk; Whiskey-Jack; Whiskey-John; Wiss-ka-chon* (Indian).

Fir and spruce forests; nests in trees.

Me.—Uncommon resident in northern part, south to Umbagog; elsewhere casual. Eggs, Mar. 16–28.

N. H.—Uncommon resident above 3000 ft. on Sandwich Range north; elsewhere casual.

Vt.—Uncommon resident in northern part and on high peaks (Mt. Mansfield); elsewhere casual (Somerset, Aug. 5, 1896).

Mass.—Accidental visitor: Lexington (nee Arlington Heights), Oct. 16, 1889; Newtonville, early summer, 1875; Salem, Oct. 25, 1878.

254. **Corvus corax principalis** Ridgway.

*Northern raven.*

Vicinity of seacoasts and large rivers; nests on cliffs or rarely in trees.

Me.—Uncommon resident, mainly coastwise. Eggs, April 14.

N. H.—Accidental visitor (in winter?).

Vt.—Very rare visitor in northern part: Brandon, 1879.

Mass.—Accidental visitor, no recent records (Williamstown, before 1877).

Conn.—Accidental visitor: South Manchester, Sept. 18, 1890.

255. Corvus brachyrynchos C. L. Brehm.

American crow.

Corvus americanus Audubon, Birds of Amer., 1842, vol. 4, p. 87, pl. 225. Egg, Bendire, 1895, vol. 2, pl. 4, fig. 8–12; pl. 5, figs. 21, 22.

Ubiquitous, though avoiding dense forests in the breeding season; nests in coniferous trees.

Me.—Common resident, in winter chiefly confined to coast. Eggs, April 20–May 25 (June 15).

N. H.—Common migrant and summer resident; in winter less common near coast and large rivers, rare elsewhere. Eggs, April 17.

Vt.—Common resident. Eggs, April 22.

Mass.—Common migrant and summer resident; common winter resident near coast, but less so inland. Eggs, April 15–June 13.

R. I.—Common migrant, summer and winter resident. Eggs, April 12–23.

Conn.—Common migrant, summer and winter resident. Eggs, April 12–May 9.

**Fish crow.**

Wils., Amer. ornith., 1812, vol. 5, p. 27, pl. 37, fig. 2.  "New Jersey...near...Philadelphia."  Egg, Bendire, 1895, vol. 2, pl. 4, figs. 16, 17.

Seaboard and near large streams; nests in trees.

**VT.**—Doubtfully recorded.

**Conn.**—Rare summer resident (Bridgeport, Fairfield, near New London, New Haven, Stratford).  Mar.–Nov. 10.  Eggs, May 12–16.

**STURNIDAE.**

257.  *Sturnus vulgaris* Linné.

**Starling.**

Open country and fields; nests in holes of buildings, trees, or cliffs.

**Me.**—Accidental visitor: Calais, May 4, 1889.

**Mass.**—Introduced at Springfield in 1897 but all disappeared; also straggler: Agawam, April, 1908; Pittsfield, Oct. 1, 1899.

**Conn.**—Local resident; apparently spreading from New York colony (New Haven, Dec. 3, 1900; Stamford, 1900; Norwalk, 1900; Weathersfield and Stonington, 1906; Bethel, 1907; New London, 1907).  Eggs, April.
258. Dolichonyx oryzivorus (Linné) Swainson.

Bobolink; Butter-bird; May-bird; Meadow-wink; Reed-bird; Rice-bird; Skunk blackbird.

Grassy meadows; nests on the ground.

N. H. — Common migrant and summer resident at lower elevations. May 1–Sept. 23.

VT. — Common migrant and summer resident. Eggs, June 1.

CONN. — Common migrant and summer resident. May 7–Sept. 5. Eggs, June 5.

259. Molothrus ater (Boddaert) Gray.

Cowbird; Clodhopper; Cow blackbird; Cow bunting; Lazy-bird; Shiney-eye.

Open country; lays eggs in nests of other small birds.

VT.—Uncommon summer resident; very rare in winter. March 23–(Dec. 30).

Mass.—Common migrant and less common summer resident; occasional in winter. (Mar. 1) Mar. 11–Nov. 21; winter. Eggs, May 15–June 15 (July 1).

Conn.—Common migrant and summer resident; rare winter resident. Mar.–Nov. 4; winter. Eggs, May 9–June 14.

260. XANTHOCEPHALUS XANTHOCEPHALUS (Bonaparte) Jordan.

Yellow-headed blackbird.

*Icterus icterocephalus* (Linné). Bonap., Amer. ornith., 1825, vol. 1, p. 27, pl. 3, figs. 1, 2. Egg, Bendire, 1895, vol. 2, pl. 6, fig. 10–12.

Open prairies, marshes, and sloughs; nests among reeds.

Mass.—Accidental visitor: Eastham, two, Sept. 10, 1877; Monomoy Id., Sept. 8, 1897; Watertown, Oct. 15, 1869.

Conn.—Accidental visitor: Hartford, late July, 1884; New Haven, June, 1878; Stamford, July, 1888.

261. AGELAIUS PHOENICEUS (Linné) Vieillot.

Red-winged blackbird; Fire-wing; Marsh blackbird; Quonka-ree; Redwing; Swamp blackbird.

PASSERES.

ICTERIDAE.

Open country, swamps, and marshes; nests in marsh grass or in bushes near water.

N. H.—Common migrant and local summer resident in valleys; accidental in winter (Warren). Mar. 3–Nov. 11 (winter).

Vt.—Common migrant and summer resident. Mar. 2–Oct.

262. Agelaius phoeniceus fortis Ridgway.

Thick-billed redwing; Northern redwing.

Marshes and open country; nests among reeds or bushes.

Conn.—Rare fall migrant and winter resident: North Haven, Nov. 11, 1903, Dec. 25, 1901, Jan. 10, 1902 (Bishop).

263. Sturnella magna (Linné) Swainson.

Meadowlark; Marsh quail; Old-field lark.

Open fields and marshes; nests on the ground.

Me.—Rare migrant and local summer resident in southern
counties (Rangeley, April 21, 1897); rare in winter (Calais, Jan., 1899; Cape Elizabeth; Westbrook, Jan. 16, 18, 1904). Mar. 15–Nov. 19 (winter). Eggs, June–(July 22).

N. H.—Uncommon summer resident north to White Mt. valleys; rare winter resident on coast. Mar. 26–Oct. 12 (winter).

Vt.—Uncommon local summer resident; rare winter resident (L. Champlain, Middlebury, Pawlet, St. Albans, West Rutland). April 2–Nov. 15 (winter).

R. I.—Common summer resident, and in coastal marshes a common winter resident. Eggs, May 6–30.

Conn.—Common summer resident and less common winter resident coastwise. Eggs, June 6.

264. *Icterus spurius* (Linné) Bonaparte.

**Orchard oriole.**

Shade trees and orchards; nests pensile in trees.

**Me.**—Accidental visitor: near Auburn; near Calais; Thomas- ton.

Vt.—Very rare summer resident: Bennington; Brattleboro (with young); Middlebury, June 1, 1883.

Mass.—Rare local summer resident near coast (to Ipswich) and in western valleys. (May 1) May 8–Aug. 15. Eggs, May 28–June 25.

INTRODUCTION.

265. Icterus galbula (Linne) Coues.

Baltimore oriole; Fire-bird; Golden oriole; Golden robin; Hang-bird; Hang-nest; Pea-bird.

Orchards and shade trees; nest pensile in trees.

Me. — Common summer resident mainly in southern counties. May 9—Aug. 30 (Sept. 10).

N. H. — Common summer resident at lower elevations. May 6—Sept. 6 (Sept. 20).

Vt. — Common summer resident; accidental in winter. May 10—Sept. (Dec. 4, 1884).

266. Icterus bullocki (Swainson) Bonaparte.

Bullock’s oriole or troupiial.

Xanthornus bullockii Swains., Phil. mag., 1827, new ser., vol. 1, p. 436. “Table land... in Mexico.”

Open country along streams; nests in trees.

Me. — Accidental visitor: Sorrento, about middle of Nov., 1889.
267. Euphagus carolinus (Müller) Richmond.

Rusty blackbird; Rusty grackle.

Swamps, marshes, and wet woods; nests in bushes and low trees.

ME.—Common migrant and in northern part a rare summer resident; accidental winter resident (Calais, 1899). Mar. 17–May; summer–Oct. 29 (winter).

N. H.—Common migrant and in northeast part, a rare summer resident (Megalloway R.). Mar. 8–May; summer; Sept. 9–Oct. 16.

Vt.—Common migrant.

Mass.—Common migrant, accidental in winter (Brookline, Feb. 8, 1879; Concord, Jan. 22, 1905; Fresh Pond, Feb. 20, 1887; Jamaica Plain, winter 1907–8). Mar. 7–May 18 (May 30); Sept. 12–Nov. 27 (winter).

Conn.—Common migrant, and rare winter resident. Mar.–April 19; Sept. 11–Nov. (Jan. 16, 29, Feb. 6, Milford; Dec. 25, 1908, New Haven).

268. Quiscalus quiscula (Linne) Jordan.

Purple grackle; Crow blackbird.

Quiscalus versicolor Vieill. Audubon, Birds of Amer., 1842, vol. 4, p. 58, pl. 221.
AVES.  

PASSERES.  

ICTERIDAE.  

Open country, groves, fields; nests in branches of coniferous trees, rarely in cavities or bushes.

Vt.— Summer resident (Perkins).  
Mass.— Occasional typical birds breed in southernmost part and coastwise to Cambridge.

R. I.— Common summer resident in southern part, where most birds are typical; casual in winter. Mar. 6–Sept. 21 (Nov., Dec. 31). Eggs, April 25–June 6.

Conn.— Common summer and accidental winter resident. (Feb. 13) Mar. 1–Nov. (winter, East Haven).

269. Quiscalus quiscula aeneus (Ridgway) Stejneger.  
Bronzed grackle; Crow blackbird.

Open country, frequenting clumps of coniferous trees in breeding season; nests in branches of trees, or less often in cavities or bushes.

N. H.— Uncommon local summer resident; casual in winter. Mar. 12–Nov. (Dec. 24, 1907, Lancaster; Jan.).

Vt.— Uncommon local summer resident. April 11–Oct.

Mass.— Common migrant and local summer resident; rare in winter near coast (also Springfield). (Feb. 23, 1909, Boston) Mar. 10–Nov. 22 (winter). Eggs, May 2–June 1.

Conn.— Common migrant. Mar. 5–April; Oct.–Nov.
270. Hesperiphona vespertina (W. Cooper) Bonaparte.

Evening grosbeak; Sugar-bird.

Wooded districts; nests in trees.

Me.—Accidental visitor: several records in winter of 1889–90, Jan. 10–Mar. 18; Woodfords, Mar. 6, 1909.

N. H.—Accidental visitor: several records in winter of 1889–90, Jan. 6–May 1.

Vt.—Accidental visitor: Burlington, about Feb. 20, 1890; Rutland, Feb. 1909.

Mass.—Accidental visitor, first recorded in the 1890 flight (Jan. 1–April); also Wellfleet, one, Dec. 5, 1903; Beverly, flock of five, Mar. 23, 1904; So. Sudbury, Feb. 14, 1909; Townsend, Feb. 7, 1909; Williamstown, Jan. 26, 1909.

Conn.—Accidental visitor, first recorded in 1890 flight (East Hampton, Mar. 2; Gaylordsville, Mar. 10; Portland, Feb., Mar.); also Litchfield, ? Feb. 1, 1905, and Feb. 11, 1905; Bristol, Feb. 27, 1907.

271. Pinicola enucleator leucura (Müller) Richmond.

Pine grosbeak; Canadian pine grosbeak; Mope.

Loxia leucura Müller, Linné's Vollstand. natursyst., suppl., 1776, p. 150. "Canada."

Spruce and fir forests; nests in trees.

Me.—Fall and winter visitor of varying abundance, and in northern forests a rare resident. Oct. 25–April 18; summer. Eggs, May 14–27.

N. H.—Fall and winter visitor of varying abundance, and uncommon summer resident above 3000 ft. in White Mts., north. Oct. 18–April 20; summer.

R. I.—Irregular winter visitor, sometimes common.

Conn.—Irregular winter visitor, sometimes common. Nov. 24–Mar. 31.

272. Carpodacus purpureus (Gmelin) Gray.

Purple finch; Red linnet.

Orchards, shade trees, and forests; nests in trees.

N. H.—Common summer resident below 3000 ft.; rare in winter. April 15–Dec. 22; winter.

Vt.—Common summer resident.

Conn.—Common summer and uncommon winter resident. Eggs, June; July 22 (2d brood).

273. **Loxia curvirostra minor** (Brehm) Ridgway.

**American crossbill; Red crossbill; Screwbill.**

*Crueirostra minor* Brehm, Naumannia, 1853, p. 193. "DER NORDAMERIKANISCHEN FREISTAATEN."

*Loxia curvirostrata* LINNÉ. Audubon, Ornith. biogr., 1835, vol. 2, p. 559, pl. 197. Egg, Capen, 1886, pl. 8, figs. 1, 2.

Coniferous forests; nests in trees.

VT.—Irregular at all seasons, but commonest in winter; breeds occasionally. Eggs, Feb., Mar.

MASS.—Irregularly common winter visitor, and occasional at all seasons; nests rarely (Framingham, 1884; Highland Light, April, 1889; Tyngsborough, Aug., 1875).

R. I.—Irregularly common winter visitor, and occasional at other seasons; not known to breed.

CONN.—Irregular winter visitor, sometimes common. Oct. 7–spring.

274. **Loxia leucoptera** Gmelin.

**White-winged crossbill.**

Coniferous forests; nests in trees.

ME.—Uncommon resident of northern part; elsewhere an irregular visitor. Nest, June.
AVES.

PASSERES.

FRINGILLIDAE.

N. H.—Uncommon resident above 3000 ft. in White Mts. and north; elsewhere an irregular visitor.

Vt.—Irregularly common winter visitor, rare in summer in northern part and on higher peaks. Nested at Lunenburg, 1878.

Mass.—Irregular fall and winter visitor, sometimes common. Oct. 22–May 12 (May 25); (June 4, 1900, Lanesboro; June 13, 1866, Newtonville).

Conn.—Rare and irregular winter visitor. Nov. 6–Mar. 7.

275. Acanthis hornemannii exilipes (Coues) Stejneger.

Hoary redpoll.

Fringilla borealis Temm. Audubon, Ornith. biogr., 1839, vol. 5, p. 87, pl. 400.

Arctic thickets in summer, open tree growth in winter migrations; nests in low trees.

Me.—Rare winter visitor: Westbrook, Jan. 26, 1896; eastern Maine (Boardman).

N. H.—Rare winter visitor: Hampton.

Vt.—Doubtfully reported.

Mass.—Rare winter visitor (some ten instances). Nov. 15–Mar. 20.

276. Acanthis linaria (Linné) Bonaparte and Schlegel.

Redpoll; Lesser redpoll; Mealy redpoll.

FAUNA OF NEW ENGLAND.

PASSERES.  FRINGILLIDAE.  OSCINES.

Arctic thickets in summer, open tree growth in winter migrations; nests in low trees.

ME.—Winter visitor of irregular abundance, and rare summer resident (Calais). Oct. 12—April 27 (May 19, 1875; summer).

VT.—Winter visitor of irregular abundance; (nest and three eggs said to have been found in late March, 1878, at Taftsville). Nov. 11—May 1 (May 11).

Conn.—Irregularly common fall and winter visitor. Fall—Mar. 31.

**Holboell's redpoll.**

*Linaria holboellii* C. L. Brehm, Handb. d. naturgesch. aller vögel Deutschl., 1831, p. 280. "IN DAS MITTLERE DEUTSCHLAND."

*Acanthis holboellii* Bonaparte and Schlegel, Monogr. Loxiens, 1850, p. 50, pl. 53.

Arctic thickets in summer, open tree growth in winter migrations; nests in low trees.

ME.—Rare winter visitor: Gorham, Feb. 3, 1903; North Bridgton, Nov. 25, 1878.

Mass.—Rare winter visitor: Lexington, Mar. 10, 1890; Swampscott, two, Mar. 26, 1883.

278. *Acanthis linaria rostrata* (Coues) Stejneger.

**Greater redpoll.**

Linota hornemanni Holb. Dresser, Birds of Europe, 1871–81, vol. 4, pl. [190], lower fig.

Arctic thickets in summer, open tree growth in winter migrations; nests in low trees.

Me.—Winter visitor of irregular abundance. Dec. 12–Mar. 15.

N. H.—Unsatisfactorily recorded.

R. I.—Rare winter visitor: East Providence, Mar. 14, 1896.

Conn.—Rare winter visitor: New Haven, Dec. 17, 1878.

Astragalinus tristis (Linné) Cabanis.

American goldfinch; Lettuce-bird; Thistle-bird; Wild canary; Yellow-bird.

Fringilla tristis Linné, Syst. nat., ed. 10, 1758, vol. 1, p. 181. "IN AMERICA SEPTENTRIONALI."

Orchards, shade trees, and edges of woods in summer, weedy fields and open country in winter; nests in trees.

Me.—Common migrant and summer resident; uncommon in winter. Eggs, July 29–Aug. 18 (Sept. 5).

N. H.—Common migrant and summer resident; uncommon in winter from White Mts. south.

Vt.—Common migrant and summer resident, less common in winter. Eggs, July 26.

Mass.—Common migrant and summer resident, less common winter resident. Eggs, July 21–Aug. 11.

R. I.—Common summer, and less common winter resident. Eggs, July 1–Aug. 7.

Conn.—Common resident. Eggs, July–Aug.
FAUNA OF NEW ENGLAND.

PASSERES.

FRINGILLIDAE.

OSCINES.

280. **Spinus pinus** (Wilson) Stejneger.

*Pine siskin; Gray linnet; Pine finch; Pine linnet.*

Coniferous forests in summer, open country and coniferous trees in fall and winter; nests in trees.

ME.—Common resident of northern part; elsewhere of irregular occurrence mainly in fall and winter. Eggs, April.

N. H.—Common resident, breeding mainly above 3000 ft. in White Mts. Eggs, mid-April.

Vt.—Common winter visitor, less common in summer, breeding irregularly. Nesting, April–May 15.

R. I.—Irregularly common fall and winter visitor. Oct.–April 17 (May 31).

Conn.—Irregularly common fall and winter visitor. Oct.–April (May 20).

281. **Spinus spinus** (Linné) Stejneger.

*European siskin.*

Coniferous woods; nests in trees.

Mass.—Cambridge, Aug. 11, 13, 17, 1904, an apparently wild bird (Brewster).

**Snowflake; Snow bunting; White snowbird.**

"in alpibus Lapponiae, Spitzbergæ ad sinum Hudsonis alibique."

Open fields, coasts, and barrens; nests on the ground.

N. H.—Common migrant and winter resident; accidental in summer (Webster, June, a cripple). Oct. 18—April 6.

Vt.—Common migrant and winter resident. Nov. 17—spring.

Mass.—Common winter resident, especially coastwise. Oct. 12—April 3 (May).

Conn.—Irregularly common winter resident. Nov. 14—Mar.

283. *Calcarius lapponicus* (Linné) Stejneger.

**Lapland longspur.**

"in Lapponia."

Open barrens and plains; nests on the ground.

Me.—Rare migrant. Mar. 10–16; Oct. 26—Dec. 29.

N. H.—Rare migrant in late fall: Hampton Beach, Nov. 30, 1899.
FAUNA OF NEW ENGLAND.

PASSERES.

R. I.—Uncommon migrant and rare winter resident. (Jan. 6, Feb. 16).  
Conn.—Uncommon migrant; may winter. (Jan. 26, 1883, Portland) Feb. 11-Mar. 16; Nov.  

284.  CALCARIUS ORNATUS (Townsend) Stejneger.  

Chestnut-collared longspur.  

Open plains; nests on the ground.  

Me.—Accidental visitor: Scarborough, Aug. 13, 1886.  
Mass.—Accidental visitor: Magnolia, July 28, 1876.  

285.  POOECEITES GRAMINEUS (Gmelin) Baird.  

Vesper sparrow; Bay-winged bunting; Grass finch; Gray-bird; Ground sparrow; White-tailed field sparrow.  

_Emberiza graminea_ (Gmel.). Audubon, Birds of Amer., 1841, vol. 3, p. 65, pl. 159. Egg, Capen, 1886, pl. 8, fig. 9–12.  
Grassy fields and uplands; nests on the ground.  

PASSERES.

FRINGILLIDAE.

Conn.—Common migrant and summer resident; rare winter resident. Late Mar.–Nov. (winter). Eggs, May 22–July 5.

286. Passerculus princeps Maynard.

Ipswich sparrow; Gray-bird.

Sand dunes and sea shores; nests on the ground (Sable Id., N. S.).

Me.—Rare migrant coastwise; may winter rarely. Mar. 20–April 8; Oct. 11–Nov. 17 (Jan. 23, 1886, near Pine Point).

N. H.—Rare migrant coastwise. Mar.–April; late Oct.–early Dec. (nec Lake Umbagog.)

Mass.—Common migrant and rare winter resident among coastal dunes; casual inland (Fresh Pond, Cambridge). Oct. 12–April 12.

287. Passerculus sandwichensis savanna (Wilson) Ridgway.

Savanna sparrow.

FAUNA OF NEW ENGLAND

PASSERES.

FRINGILLIDAE.

Grassy fields and marshes; nests on the ground.

ME.—Common summer resident, accidental in winter. (Jan. 24, 1897, Seguin Id.) April 6–early Nov. (Nov. 28). Eggs, May 31–June 18; July (2d brood).

Vt.—Common summer resident. April 7–fall.

Conn.—Common migrant and summer resident. April–Nov.

Grasshopper sparrow; Yellow-winged sparrow.

Grassy fields and meadows; nests on the ground.

ME.—Rare summer visitor (?) or resident) east to Calais. May 24–June 29.

N. H.—Rare summer resident in lowlands south of Lake Winnipesaukee. May 13–?

Vt.—Rare summer resident of southern and western valleys. Eggs, July 17.
PASSERES.  

FRINGILLIDAE.  

Conn.—Common summer resident in southern part and Connecticut valley. Late April–?

289. Ammodramus henslowii (Audubon) Gray.

Henslow's sparrow.

 Emberiza henslowii Aud., Ornith. biogr., 1831, vol. 1, p. 360, pl. 77. "opposite Cincinnati, in the state of Kentucky."

Ammodramus henslowii (Aud.). Chapman, Handb. birds east. No. Amer., 1895, p. 294. Egg, Capen, 1886, pl. 9, figs. 1, 2.

Meadows and sedgy weed-grown bogs; nests on the ground.

N. H.—Rare local summer resident north to White Mt. valleys (Wonalancet). April 17–Aug.

Vt.—Rare local summer resident in southern part (Pownall).

R. I.—Rare migrant and summer resident: Cranston, late April, 1874; Warwick, Oct. 6, 1898; Westerly, June 6 and 8, 1900.

Conn.—Rare local summer resident (Eastford, Killingworth, Woodstock, etc.). May–fall. Eggs, Aug. 6.

290. Ammodramus caudacutus (Gmelin) Swainson.

Sharp-tailed sparrow.

FAUNA OF NEW ENGLAND.

PASSERES.

FRINGILLIDAE.

Salt marshes; nests on the ground.

ME.— Rare summer resident locally in Cumberland Co. June 5–late Oct. (? Nov.).
Vt.— Doubtfully recorded (Lumenburg).
Mass.— Uncommon summer resident of the coastal salt marshes (Ipswich); rare winter resident (West Barnstable). May 19–Nov. 8 (winter). Eggs, June 8–July 12.

Nelson's sparrow; Nelson's sharp-tailed finch.

Marshes; nests on the ground.

Mass.— Uncommon fall migrant; rare winter resident on south coast. Sept. 25–Oct. 15 (winter).
Conn.— Rare spring and uncommon fall migrant on coastal marshes. May; Oct.

292. Ammodramus nelsoni subvirgatus (Dwight) Norton.

Acadian sharp-tailed sparrow.

*Ammodramus caudacutus subvirgatus* Dwight, Auk, 1887, vol. 4
Dwight, Auk, 1896, vol. 13, pl. 4, upper fig.
Brackish or freshwater marshes; nests on the ground.

Me.—Uncommon migrant and local summer resident coastwise from Sagadahoc Co., north. May 20–summer; Sept. 10–Oct. 24 (Nov. 15).
R. I.—Uncommon migrant: Charlestown Beach, four, Oct. 15, 1899; Point Judith, April 27, 1887.
Conn.—Rare spring and uncommon fall migrant. Late May–June 9; Oct.

293. Ammodramus maritimus (Wilson) Swainson.
Seaside sparrow or finch; Meadow chippy.

Fringilla maritima Wils., Amer. ornith., 1811, vol. 4, p. 68, pl. 34, fig. 2. "Low, rush-covered sea islands along our Atlantic coast."
Salt marshes; nests on the ground.

Me.—Accidental visitor: Shark Id., Aug. 18, 1884.
N. H.—Erroneously recorded for A. caudacutus.
Mass.—Rare local summer (Westport) and winter resident on south coast. April 14–(winter). Eggs, July 17.
Conn.—Common summer and possibly rare winter resident of the salt marshes. Late May–Sept. (Dec. 9, 1889, Bridgeport). Eggs, June 8–19.
294. Chondestes grammacus (Say) Bonaparte.

Lark sparrow; Quailhead; Road-bird.

Fringilla grammaca Say, Long's Exped. to Rocky Mts., 1823, vol. 1, p. 139. "Belle fontain, as well as at several other points on this [Missouri] river." Bonap., Amer. ornith., 1825, vol. 1, p. 47, pl. 5, fig. 3.  
Grassy fields; nests on the ground or in low trees and bushes.

Mass.—Rare visitor (seven records). April 29; Aug. 12–Nov. 25.

295. Zonotrichia leucophrys (Forster) Swainson.

White-crowned sparrow.

Edges of thickets; nests on the ground or in low bushes.

Me.—Uncommon migrant; casual in summer (Androscoggin Lake, June, 1898; Farmington, late June, 1887; Woolastook Valley, Aug.). (May 2) May 5–25; (June, Aug.); Sept. 22–Oct. 22 (Nov. 8).  
Vt.—Uncommon migrant; said to have bred at Rutland; nest built and one egg laid at East Berkshire. May 14 (July, 1906, Mt. Mansfield); Oct. 4–24.  
Mass.—Uncommon migrant. May 4–27 (June 6); Sept. 23–Nov. 5.  
R. I.—Uncommon migrant; casual in summer (near Providence, July 9). May; Oct.  
Conn.—Uncommon migrant; may winter rarely. (Mar. 20) May 10–15; Oct. 12–Dec. 5.
296. *Zonotrichia albicollis* (Gmelin) Swainson.

**White-throated sparrow; Mountain lark; Peabody-bird.**

Thickets; nests on the ground, rarely in bushes.

ME.—Common migrant, and from Cumberland Co. north, a common summer resident; accidental in winter (Falmouth, winter, 1904; Lewiston, Mar. 30, 1904; Lubec, Mar. 24, 1906; Saco Jan. 20, 1886). April 18–Nov. 9 (Nov. 20) (winter). Eggs, May 24–June 13.

N. H.—Common migrant, and a common summer resident to 5000 ft. in northern half, local in southern. April 23–May 14; summer; Sept.–Oct.

MASS.—Common migrant and at higher elevations of western part, a less common summer resident, sporadic in eastern (Boxford, Framingham, Wakefield); rare winter resident near coast. April 15–May 26; summer; Sept. 1–Nov. 24; winter. Eggs, June.

R. I.—Common migrant and rare winter resident. April 28–May 10; Oct. 1–Nov. 1; winter.

CONN.—Common migrant and uncommon winter resident; may breed at higher elevations (Litchfield, June 26, 1906). April 15–May 20 (June); Sept. 22–Nov.; winter.

297. *Spizella monticola* (Gmelin) Baird.

**Tree sparrow; Winter chip-bird; Winter chippy.**

PASSERES.

FRINGILLIDAE.

"in America septentrionali."
Arctic thickets in summer; fields and marshes in winter migration; nests on the ground.

ME.—Common migrant and in southern counties a winter resident. (Early Aug., Fort Kent; Sept.) Oct. 8–April 28 (May 16).
Vt.—Common migrant and less common winter resident. Oct.–April.
Mass.—Common migrant and less common winter resident. (Sept. 21) Oct. 16–April 28 (May 7, 1893, Lexington).
R. I.—Common winter resident. Nov. 7–April 15.
Conn.—Common migrant and less common winter resident. Oct. 28–April 12.

298. Spizella passerina (Bechstein) A. O. U. comm.

Chipping sparrow; Chip-bird; Chippy; Hair-bird.

Orchards, fields, and vicinity of dwellings; nests in trees, hedges, or vines.

ME.—Common migrant and summer resident. (April 2) April 9–Oct. 23 (Nov. 7). Eggs, May 23–June 2; early July (2d brood).
Vt.—Common migrant and summer resident. April 4–Oct.
PASSERES.

FRINGILLIDAE.

Conn.—Common migrant and summer resident; rare winter resident. April—Nov. (winter).

299. Spizella breweri Cassin.

Brewer’s sparrow.

Prairies; nests on the ground.

300. Spizella pusilla (Wilson) Bonaparte.

Field sparrow; Ground sparrow; Huckleberry-bird.

Fringilla pusilla Wils., Amer. ornith., 1810, vol. 2, p. 121, pl. 16, fig. 2. “Pennsylvania...north and South Carolina...Georgia.” Audubon, Ornith. biogr., 1834, vol. 2, pl. 139.

Bushy fields; nests on the ground or in low bushes.

Me.—Uncommon summer resident in southern counties. April 7—Oct. 1.

N. H.—Locally common summer resident north to White Mt. valleys April 3—Oct. Eggs, June 12.

PASSERES.  

FRINGILLIDAE.  

Mass.—Common summer resident and near the coast a rare winter resident. (Mar. 29) April 1–Nov. 13; (winter). Eggs, May 8–June 12.

Conn.—Common summer and rare winter resident. (Late Mar.) April 6–Dec. 2 (winter, Hartford, New Haven). Eggs, June 22.

301. Junco hyemalis (Linné) Selater.

Slate-colored Junco; Black snowbird; Blue snowbird; Junco; Snowbird; White-bill.

Chapman, Handb. birds east. No. Amer., 1895, p. 304; Bird-life, 1898, pl. 48. Egg, Capen, 1886, pl. 9, figs. 14, 15.

Thickets, weedy and brushgrown fields; nests on the ground, rarely in bushes.

Me., N. H.—Common migrant and mainly in northern part, a common summer resident; rare winter resident in southern part Eggs, May 7–June 29; July 19 (2d brood).

Vt.—Common migrant, less common summer and winter resident.

Mass.—Common migrant, less common winter resident; uncommon summer resident in western highlands (Mts. Holyoke, Nonotuck, Tom, Wachusett, Berkshires), sporadic in east (? Boxford, Medford, Wellfleet). Mar. 8–May 21; summer; Sept. 3–Nov. 30; winter. Eggs, -(Aug. 6).

Conn.—Common migrant and winter resident; rare local summer resident (Bear Mt., Salisbury, 2354 ft.). Oct. 8–May 3 (summer).
302. **Junco hyemalis montanus** (Ridgway) A. O. U. comm.

**Montana Junco.**

Edges of thickets; nests on the ground.

Mass.—Accidental visitor: Watertown, Mar. 25, 1874 (this specimen has been recorded as *J. h. shufeldti* and *J. h. oregonus*).

303. **Melospiza melodia** (Wilson) Baird.

**Song sparrow; Bush sparrow; Ground-bird; Ground sparrow.**

Swamps, marshes, weedy fields; nests on the ground, in bushes, or even hollow trees.

Me.—Common migrant and summer resident; rare winter resident (Calais, Cape Elizabeth, Gardiner). Mar. 7–Nov. (winter). Eggs, (April) May 20–June 7; July (2d brood).

Vt.—Common migrant and summer resident; rare winter resident in southern part (Bethel, Brattleboro, Brownsville, Taftsville). Mar. 7–fall (winter).

Mass.—Common migrant and summer resident; less common winter resident at lower elevations. Mar. 10–Nov. 15; winter. Eggs, April 30–July 29 (2d brood).

R. I.—Common migrant and summer resident; less common winter resident. Mar. 1–Nov. 14; winter. Eggs, May 7–10.

Conn.—Common migrant and summer resident; less common winter resident. Eggs, May 24–(Aug. 20).
304. **Melospiza lincolnii** (Audubon) Baird.

**Lincoln's sparrow; Lincoln's finch.**

Edges of dense thickets and tangled growth; nests on the ground.

Me.—Rare spring and uncommon fall migrant; rare summer resident in extreme north (Ft. Kent; ♂ said to have been taken at Boothbay, July 14, and four birds at Bobson’s Id., Aug. 9). May 12–June 1; (summer); Sept. 8–Oct. 13.

N. H.—Rare spring and uncommon fall migrant (once reported in summer, Nubanusit Lake, July 28, 1900, Thayer). May 13–26; (? summer); Sept. 7–Oct. 4.

Vt.—Rare migrant.

Mass.—Rare spring and uncommon fall migrant. May 7–June 1; Sept. 12–Oct. 14 (Nov. 1).

R. I.—Rare migrant, mainly in fall. (Spring); Sept. 27.

Conn.—Rare spring and uncommon fall migrant. May 23; Sept. 21–Oct. 3.

305. **Melospiza georgiana** (Latham) Ridgway.

**Swamp sparrow.**

*Fringilla palustris* Wils. Audubon, Ornith. biogr., 1839, vol. 5, pl. 64. Egg, Capen, 1886, pl. 9, fig. 7–9.

Swamps, marshes, and old fields; nests on the ground.

Me.—Uncommon migrant and local summer resident. (Mar. 20, Bangor) April 6–Nov. 15. Eggs, May 31–June 3.
AVES.

PASSERES.

FRINGILLIDAE.

N. H., Vt.—Common migrant and less common local summer resident at lower elevations. April–Oct. 25.

Mass.—Common migrant and local summer resident; rare winter resident near the coast (to Beverly, Fresh Pond, Cambridge). Mar. 27–Nov. 30; winter. Eggs, May 13–July 14.

Conn.—Common migrant and less common local summer resident; rare winter resident. April 5–Nov. 20 (winter).

306. Passerella iliaca (Merrem) Swainson.

Fox sparrow; Fox-colored sparrow.

Thickets and edges of woods; nests on the ground or in low trees.

Me.—Common migrant; accidental in winter. Mar. 15–April 17 (May 15); Oct. 8–Nov. 28 (Dec. 2, 9, 17, Seguin Id.; Jan. 24, 1909, Cape Elizabeth; Feb.).

Vt.—Common migrant. Mar. 15–April 5; fall.

Mass.—Common migrant and rare winter resident near the coast. (Feb. 26, 1906, Springfield; Mar. 3) Mar. 9–April 25 (May 2); (Sept. 17, Oct. 2) Oct. 15–Nov. 29 (Dec. 6 and winter).

R. I.—Common migrant and occasional winter resident. Mar. 19–April 20 (May 21); Oct. 13–Nov. 27 (winter).

Conn.—Common migrant, and rare winter resident. Mar. 6–April 19; Oct. 10–Nov. 28 (winter).

Towhee; Chewink; Ground robin; Marsh robin; Pewink.

FAUNA OF NEW ENGLAND.

PASSERES. FRINGILLIDAE. OSCINES.

Thickets and sprout land; nests on the ground, rarely in bushes.

Me.—Uncommon summer resident in southwestern counties. May 6–Oct. 18 (Nov. 21).
N. H.—Common summer resident in southern part, becoming uncommon north to White Mt. valleys. May 1–Oct. 15.
Vt.—Uncommon summer resident. May–Sept.
Mass.—Common summer and very rare winter resident. (April 2) April 18–Oct. 22 (Nov. 30, Dec. 4); (winter). Eggs, May 17–June 12.

308. Cardinalis cardinalis (Linné) Lichtenstein.

Cardinal; Cardinal grosbeak; Red-bird; Virginia nightingale.

Loxia cardinalis Linné, Syst. nat., ed. 10, 1758, vol. 1, p. 172. "IN AMERICA SEPTENTRIONALI."

Bushy fields and thickets; nests in bushes.

Me.—Several recorded; probably some are escaped cage birds (♀ from flock of three, Gardiner, Dec. 19, 1895).
Vt.—Rare visitor or escape: Brattleboro.
Mass.—Occasional visitor at all seasons and escape; doubtfully stated to have bred at Cambridge (a wild bird and a freed cage bird nested in Brookline, eggs, June 6, 1898).
Conn.—Occasional visitor or escape.

**Rose-breasted grosbeak; Throat-cut.**

Orchard and shade trees and borders of woods near water; nests in bushes and trees.

**ME.**—Common summer resident except in eastern part. (April 26) May 4–Aug. 27. Eggs, June 10–30.

**N. H.**—Common summer resident at lower elevations. May 12–Sept. 18.

**Conn.**—Common summer resident; accidental in winter. May 1–Sept. (Nov. 25; Jan. 18, 1893, Stonington). Eggs, May 24.

**Blue grosbeak.**

Brush-grown fields and thickets; nests in bushes or weedy growths.

**ME.**—Recorded from Calais, but in error for Grand Menan, N. B.
168        FAUNA OF NEW ENGLAND.

PASSERES.       FRINGILLIDAE.

N. H. — Doubtfully recorded from East Derry, May 26, 1894.

Indigo bunting; Indigo-bird.

"in Carolina."
Spiza cyanea Wils. Audubon, Birds of Amer., 1841, vol. 3,
p. 96, pl. 170. Egg, Capen, 1886, pl. 10, fig. 8.
Brush-grown fields, thickets, and weedy tangles; nests among low
bushes, brambles, or tall weeds.

Me. — Common summer resident in southern, and rare in norther-
N. H. — Common migrant and summer resident at lower eleva-
Vt. — Common migrant and summer resident. May 18–fall.
Eggs, May 30.
Mass. — Common migrant and summer resident. May 8–
R. I. — Common summer resident, mainly in northern part.
May 10-Oct. Eggs, June 1–11.
Conn. — Common migrant and summer resident. May 9-Oct.
Eggs, June 16.

312. Spiza americana (Gmelin) Ridgway.

Dickcissel; Black-throated bunting; Judas-bird.

58, pl. 156. Egg, Capen, 1886, pl. 10, fig. 7.
Grassy fields; nests on the ground or in low bushes.
Me.—Accidental visitor: Job’s Id., Penobscot Bay, Sept. 29, 1884; St. George; Westbrook, Oct. 10, 1888.

Mass.—Formerly an uncommon summer resident along coast and in western valleys; now unknown. May 15–Oct. 3. Eggs, June 9, 1877 (Medford)—Aug. 1, 1878 (2d brood, Hyde Park).

Conn.—Formerly a summer resident, now unknown.

313. Calamospiza melanocorys Stejneger.

Lark bunting.

Prairies; nests on the ground.

Mass.—Accidental visitor: Lynn, Dec. 5, 1877.

Tangaridae.

314. Piranga ludoviciana (Wilson) Richardson.

Louisiana tanager; Western tanager.

Tanagra ludoviciana Wils., Amer. ornith., 1811, vol. 3, p. 27, pl. 20, fig. 1. “Louisiana.”

Mountain forests; nests in trees.

Me.—Accidental visitor: near Bangor, about Oct. 1, 1889.

Mass.—Accidental visitor: Salem, Jan. 20, 1878.

Conn.—Accidental visitor: New Haven, Dec. 15, 1892.

315. Piranga erythromelas Vieillot.

Scarlet tanager; English robin (Berkshires); Fire-bird; Pocket-bird; War-bird.

PASSERES. TANGARIDAE. OSCINES.

Deciduous woods, especially oaks and chestnuts; nests in trees.

Me.—Rare summer resident. May 12–Oct. 5.

Vt.—Uncommon summer resident. May–fall.

316. **Piranga rubra** (Linne) Vieillot.

_Summer tanager; Summer redbird._

Open deciduous and mixed woods; nests in trees.

Me.—Accidental visitor: Portland, May 18, 1906; Wiscasset.

N. H., Vt.—Doubtfully recorded.

Mass.—Accidental summer visitor. April 21, May, June, July, Aug.

R. I.—Accidental summer visitor: Providence (two seen); Seaconnet, April 27, 1901; Ten Mile River.

Conn.—Rare visitor. April, July.

HIRUNDINIDAE.

317. **Progne subis** (Linne) Baird.

_Purple martin; Black martin; Cape Cod swallow; House martin; Martin._
AVES.

PASSERES.

HIRUNDINIDAE.

Open country and vicinity of dwellings; nests in cavities or bird houses.

N. H. — Local summer resident north to White Mt. valleys; now uncommon. April 19–Sept.

Conn. — Uncommon migrant and local summer resident; formerly more common. April 17–fall. Eggs, May 21.

318. Petrochelidon lunifrons (Say) Cassin.

Cliff swallow; Eave swallow; Mud swallow; Republican.

Open country; nests in colonies under cliffs or eaves of outbuildings.

Me. — Common migrant and summer resident. (April 11, Bangor) April 21–Sept. 6 (Sept. 19). Eggs, June 1–July 2.

PASSERES.

HIRUNDINIDAE.

OSCINES.

Vt.—Common migrant and summer resident. Late April—summer.

Conn.—Common migrant and less common local summer resident. (April 15) April 20—Sept. Eggs, May 26—? (2 broods).

319. Hirundo erythrogaster Boddaert.

Barn swallow; Fork-tailed swallow.

Open country; nests in crevices of cliffs, but now generally on rafters of old barns.

N. H.—Common migrant and summer resident at lower elevations. April 20—Sept. 21.

Vt.—Common migrant and summer resident. April 25—fall.

Conn.—Common migrant and summer resident. April 21—Sept. Eggs, (!Sept. 3).

320. Iridoprocne bicolor (Vieillot) Coues.

Tree swallow; Little martin; White-bellied swallow.

Hirundo bicolor Vieill., Hist. nat. ois. Amér. Sept., 1807, vol. 1,
PASSERES.

HIRUNDINIDAE.

p. 61, pl. 31. "États-Unis." Audubon, Birds of Amer., 1840, vol. 1, p. 175, pl. 46. Egg, Capen, 1886, pl. 6, fig. 10.

Open country, especially near water; nests in cavities of dead trees or in bird boxes.

Vt.—Common migrant and less common summer resident.

Eggs, June 1.

321. Riparia riparia (Linné) Sharpe and Wyatt.

Bank swallow; Sand martin or swallow.

Open country near rivers and lakes; nests in colonies in burrows dug in sandy bluffs.

Vt.—Common migrant and local summer resident. April 28–summer.
FAUNA OF NEW ENGLAND.

PASSERES.

HIRUNDINIDAE.

Conn.—Common migrant and local summer resident. April 21–summer.

322. Stelgidopteryx serripennis (Audubon) Baird.

Rough-winged swallow.

Chapman, Handb. birds east. No. Amer., 1895, p. 322, fig. 90. Egg, Capen, 1886, pl. 6, fig. 15.

Open country near water; nests in holes in banks, or in cavities of cliffs and walls.

N. H.—Rare summer resident: near Hanover, 1905, 1906.
Vt.—Rare summer resident (noted at Bennington; Lunenburg; Norwich, May 6, 1905, April 29, 1906; West Danville, June 11, 1901; White River Junction). April 29–summer. Eggs, May 16.

Mass.—Rare local summer resident in western part (Glendale, young, 1906; Longmeadow, nesting, May, 1906; North Adams, two nesting pairs, June, 1895). May–summer.

Conn.—Rare local summer resident. (April 12) May 9–summer. Eggs, May 26–June 9.

BOMBYCILLIDAE.

323. Bombycilla garrula (Linné) Vieillot.

Bohemian waxwing.

AVES.

PASSERES.

BOMBYCILLIDAE.

Lanius garrulus Linné, Syst. nat., ed. 10, 1758, vol. 1, p. 95. "In Europa & America boreali; aestivat supra Sveciam."

Evergreen forests; nests in trees.

Me.—Rare and irregular winter visitor. Dec. 6–Feb. 6.

N. H.—Rare winter visitor: Hampton Falls, Feb. 17 and 21, 1897; Nashua, 1880.

Vt.—Rare winter visitor: Brattleboro, April, 1901; Burlington (bis); St. Albans (bis). Nov. 25–April.

Mass.—Rare winter visitor: about six authentic records. Dec. 26–Feb. 18.

Conn.—Accidental winter visitor: East Windsor Hill, near Hartford; ? New Haven, Feb. 11, 1875.

324. Bombycilla cedrorum Vieillot.

Cedar waxwing; Apple-bird; Canada robin; Cedar-bird; Cherry-bird.

Orchards, shade trees, and woods; nests in trees.

Me.—Common migrant and summer resident; rare in winter. Eggs, June 29.

N. H.—Common migrant, and at lower elevations a common summer resident; rare in winter in southern part. Eggs, July 29.

Vt.—Common migrant and summer resident; uncommon in winter in southern part.

Mass.—Common migrant and less common summer resident; irregularly common in winter but generally absent in Nov. and Dec. Eggs, May 30–July.

R. I.—Common migrant and summer resident; irregular in winter. Eggs, June 7–20.
PASSERES.  

OSCINES.

**BOMBYCILLIDAE.**

Conn.—Common migrant and summer resident; irregular in winter. Eggs, June 20–Aug. 1 (Aug. 27).

**LANIIDAE.**

325. *Lanius borealis* Vieillot.

**Northern shrike; Butcher-bird.**

Open country and edges of woods; nests in trees.

Me.—Uncommon winter resident; supposed breeding records refer to *L. l. migrans*. Oct. 15–April 17.

N. H.—Uncommon winter resident at lower elevations. Nov. 12–April.

Vt.—Uncommon winter resident. Fall–April 13.

Mass.—Uncommon winter resident. (Oct. 6) Oct. 12–April 16 (May).

**Loggerhead shrike.**

Open country; nests in trees.

Conn.—Accidental visitor: South Norwalk, Feb. 17, 1905 (J. A. Allen).
AVES.

PASSERES.

LANIIDAE.

327. Lanius ludovicianus migrans W. Palmer.

Migrant shrike; Butcher-bird; Cricket hawk; Grasshopper hawk; Joree; Mouse hawk.

Egg, Capen, 1886, pl. 7, figs. 11, 12.
Orchards and open tree growth; nests in trees.

Vt.—Uncommon local summer resident. Mar. 3–fall. Eggs, April 28–May 23.
Mass.—Rare migrant and in western part, rare summer resident; very rare in winter. Mar. 29–Nov. 27 (Dec. 19, Jan., Feb.). Eggs, May 10 (Williamstown).
R. I.—Rare migrant. (?) Spring); Aug. 29–Sept. 2.
Conn.—Rare migrant and winter resident (Portland, Nov. 1876; Saybrook, Jan., 1879); possibly a rare summer resident (Mt. Carmel, May 24, 1873). Spring–(May 24); Aug. 29–winter.

VIREONIDAE.

328. Vireosylva olivacea (Linné) Bonaparte.

Red-eyed Vireo; Politician; Preacher; Red-eyed greenlet.

Orchards and deciduous shade and forest trees; nest pensile in trees or bushes.
VIREONIDAE.

VT.—Common summer resident. May 9–fall.

CONN.—Common summer resident. May 6–Oct. 2. Eggs, June 1–12.

329. VIREOSYLVA PHILADELPHICA Cassin.

Philadelphia Vireo; Brotherly-love Vireo.

Open deciduous growth, especially of birch and poplar; nest pensile in trees or bushes.

VT.—Rare migrant: Breadloaf, Sept. 19, 1900; Morrisville; Pittsford, Sept. 11, 1889. (Reported nesting at Brattleboro, June, 1901.) May; Sept. 11–19.

MASS.—Rare migrant. May (? 10)–17; Sept. 7–27.

R. I.—Rare migrant: Drownville, May 31, 1891; West Greenwich, May 21, 1902.

CONN.—Rare migrant: New Haven, May 19, 1888; Portland, Sept. 21, 1893, Sept. 17, 1894; (? Stratford, "Vireo gilvus... under parts... mostly bright yellow").
330. **Vireosylva gilva** (Vieillot) Cassin.  

**Warbling Vireo.**

Orchard and shade trees, especially elms; nest pensile in trees.

**Me.**—Uncommon local summer resident. May 5–Sept. 15 (Oct. 7).

**N. H.**—Uncommon local summer resident north to White Mt. valleys. May 1–Sept. 17.

**Vt.**—Uncommon local summer resident. May 3–

331. **Lanivireo flavifrons** (Vieillot) Lawrence.  

**Yellow-throated Vireo.**

Orchard and shade trees and edges of woods; nest pensile in trees.

**Me.**—Rare summer resident in southwestern counties. Mar. 12–Sept.

PASSERES.  

VIREONIDAE.  

OSCINES.  

Vt.—Uncommon summer resident (East Bethel).  

332. Lanivireo solitarius (Wilson) Allen.  

Blue-headed Vireo; Solitary Vireo.  

Vireo solitarius Vieill. Audubon, Birds of Amer., 1842, vol. 4, p. 144, pl. 239. Egg, Capen, 1886, pl. 7, fig. 9.  
Cool mixed woods; nest pensile in trees.  

Me.—Uncommon summer resident mainly in northern part. (April 24) April 28–Oct. 6 (Nov.).  
Vt.—Uncommon summer resident.  

333. Vireo griseus (Boddaert) A. O. U. comm.  

White-eyed Vireo; White-eye.  

PASSERES.

VIREONIDAE.

Bushy thickets; nest pensile in bushes.

Me.—Doubtfully recorded.

N. H.—Several unsatisfactory records: Chesterfield, Manchester.

Vt.—Accidental visitor: Brattleboro; ? St. Johnsbury, various records (Clark); Townshend, 1893.

Mass.—Rare local summer resident near coast and in southern valleys (Sheffield). May 2–Sept. 27 (Oct. 30). Eggs, May 22–June 18.

334. Vireo bellii Audubon

Bell's Vireo.

Bushy thickets; nest pensile in bushes or low trees.

N. H.—Accidental visitor: Durham, Nov. 19, 1897.

MNIOTILTIDAE.

335. Mniotilta varia (Linné) Vieillot.

Black and white warbler; Black and white creeper.

Chapman, Warblers No. Amer., 1907, p. 39, pl. 2, figs. 4, 5. Egg, Capen, 1886, pl. 3, figs. 2, 3.

Motacilla varia Linné, Syst. nat., ed. 12, 1766, vol. 1, p. 333. "In Jamaica, Dominica."

Deciduous and mixed woods; nests on the ground.
PASSERES.  
MNIOTILTIDAE.

Vt.—Common migrant and summer resident. May 5–fall. Eggs, June 20.

336. Protonotaria citrea (Boddaert) Baird.

Prothonotary warbler; Golden swamp warbler.

Chapman, Warblers No. Amer., 1907, p. 54, pl. 3, fig. 3–4. 
Motacilla citrea Bodd., Tabl. d. planch. enlum. d'hist. nat., 1783, p. 44. Description in Buffon: "Louisianie."

Bushy and tree-grown swamps; nests generally in cavities of stumps or dead trees.

Me.—Accidental visitor: Calais, Oct. 30, 1862.

Vt.—Doubtfully recorded.

Mass.—Accidental visitor. May 1–Sept. 15.

R. I.—Accidental visitor: Lonsdale, April 29, 1892, April 19, 1893; South Kingston, April 20 or 21, 1884.

337. Helmitheros vermivorus (Gmelin) Bonaparte.

Worm-eating warbler.

AVES.

PASSERES.

MNIOTILTIDAE.

Dry wooded slopes and ravines with undergrowth; nests on the ground.

Me., N. H.— Unsatisfactorily recorded.

Vt.— Accidental visitor: St. Albans, 1891.

Mass.— Accidental visitor: Cambridge, Sept. 19, 1881; Easthampton; Salem Willows, April 14–16, 1902; Taunton, May 9, 1890.

338. Helminthophila pinus (Linné) Ridgway.

Blue-winged warbler; Blue-winged yellow warbler.

Chapman, Warblers No. Amer., 1907, p. 65, pl. 5, fig. 1–2. Egg, Capen, 1886, pl. 3, fig. 7.

“in America septentrionali.”

Low woods and sprout land; nests on the ground.

Vt.— Unsatisfactorily recorded.

R. I.— Very rare summer resident: nest at Gloucester, May 30, 1890.

339. Helminthophila chrysoptera (Linné) Ridgway.

Golden-winged warbler.

Chapman, Warblers No. Amer., 1907, p. 60, pl. 5, fig. 5–6. Egg, Capen, 1886, pl. 3, fig. 8.

Low bushy growths and sprout lands; nests on the ground.
N. H.—Rare in spring and early summer in southernmost part; may breed. May, June.

Vt.—Rare migrant; "rare summer resident" (Perkins). Spring; (Oct. 26, 1907, Woodstock).

R. I.—Rare summer resident.

**Nashville warbler.**

*Sylvia rubricapilla* Wils., Amer. ornith., 1811, vol. 3, p. 120, pl. 27, fig. 3; vol. 6, p. xv. "TENNESEE. . . . NOT FAR FROM NASHVILLE."

Open woodland and thickets bordering swamps; nests on the ground.

Vt.—Common migrant and summer resident. May 3–fall.

AVES.

PASSERES.

MNIOTILTIDAE.

341. **Helminthophila celata** (Say) Ridgway.

**Orange-crowned warbler.**

Chapman, Warblers No. Amer., 1907, p. 86, pl. 7, figs. 3, 4.

Wooded and bushy country; nests on or near the ground.

ME.— Unsatisfactorily accredited (Brunswick).

Mass.— Very rare spring and late fall migrant; accidental in winter. May 15 (Springfield); Sept. 30–Nov. 29 (Jan. 1, 1875, Lynn).

R. I.— Very rare spring and late fall migrant: Cranston, Dec. 3, 1874; East Providence, May 9, 1891.

Conn.— Rare migrant. May 8, 1888 (East Hartford); Oct.–Nov.

342. **Helminthophila peregrina** (Wilson) Ridgway.

**Tennessee warbler.**

Chapman, Warblers No. Amer., 1907, p. 83, pl. 7, figs. 1, 2.

Dense thickets and edges of woods; nests near the ground.

ME.— Rare migrant and in northern part, a rare summer resident. May 15–26; summer. Eggs, June 4.

N. H.— Rare migrant and from White Mts. north, a rare local summer resident (Franconia, Lake Umbagog). May 20–Sept. 9.

Vt.— Rare migrant and possible summer resident (Mt. Holly, two pairs, June, 1897, above 2000 ft.).

Mass.— Rare migrant and possibly a very rare summer resident (Mt. Greylock, July 15 and 16, 1888; ? Springfield, very doubtful). May 10–30; (July 15, 16); Aug.–Sept. 10.
PASSERES. OSCINES.

MNIOTILTIDAE.

R. I.— Rare migrant. May 18; Sept. 18.
Conn.— Rare migrant. May 19–27 (June 8); Sept. 24–(? Nov., Clark).

343. Compsothlypis americana usneae Brewster.

Northern Parula warbler; Blue yellow-backed warbler; Usnea warbler.

Brewst., Auk, 1896, vol. 13, p. 44. "Lake Umbagog, Maine."
Chapman, Warblers No. Amer., 1907, p. 104, pl. 8, fig. 1–3. Egg, Capen, 1886, pl. 3, figs. 4, 5.

Forests and open tree growth; nests in pendulous masses of Usnea lichen.

VT.— Common migrant and less common summer resident. May 2–fall.

344. Dendroica tigrina (Gmelin) Baird.

Cape May warbler.

Chapman, Handb. birds east. No. Amer., 1895, p. 352. Egg, Capen, 1886, pl. 4, fig. 15.

Northern coniferous forests in summer, and open tree growth in migration; nests in trees.

Me.— Rare migrant and in northern part a rare summer resident. May 6–24; summer–Aug. 22.

N. H.— Rare migrant and north of White Mts. a rare summer resident (Franconia, June 3). May 10–Sept.

Vt.— Rare migrant and (?) summer resident (Mt. Killington, Ross).

Mass.— Rare migrant. (May 2) May 10–25; Aug. 18–Sept. 15 (Oct. 9).

R. I.— Rare migrant. May 13–20; Sept.

Conn.— Rare migrant. May 8–26; Aug. 28.

345. Dendroica aestiva (Gmelin) Baird.

Yellow warbler; Cotton wren; Garden warbler; Golden warbler; Spy-about; Summer yellow-bird; Wild canary; Yellow-belly; Yellow-bird.

Orchards, shade trees, and bushy swamps; nests in trees and bushes.

Vt.— Common summer resident of valleys and bottomlands. May 4–Sept.

Mass.— Common migrant and summer resident. (April 23)
FAUNA OF NEW ENGLAND.

PASSERES. MNIOTILTIDAE. OSCINES.

346. Dendroica caerulescens (Gmelin) Baird.

**Black-throated blue warbler.**

Chapman, Warblers No. Amer., 1907, p. 133, pl. 9, fig. 1–3. Egg, Capen, 1886, pl. 4, fig. 1.

Thickets and forest undergrowth; nests near the ground.

Vt.—Uncommon summer resident in northern part. May 5–fall.

Mass.—Common migrant and at higher elevations of western part (Granville, Russell, and north) a less common summer resident. May 5–June 3; summer; Aug. 26–Oct. 11 (Nov. 3, 19).

347. Dendroica coronata (Linne) Gray.

**Myrtle warbler; Golden-crowned warbler; Willow warbler; Yellow-rumped warbler.**

Chapman, Warblers No. Amer., 1907, p. 141, pl. 10, fig. 1–3. Egg, Capen, 1886, pl. 4, fig. 2–4.
MNIOTILTIDAE.

Coniferous woods, and in migration, open tree growth; nests in trees.

ME.—Common migrant and south to Scarboro a less common summer resident; rare winter resident (Cape Elizabeth). April 15–Oct. 30 (winter). Eggs, May 30–June 11.

VT.—Common migrant, and uncommon summer resident (south to Brattleboro). April 12–fall.

MASS.—Common migrant, and in higher parts of western counties an uncommon summer resident (to Mt. Wachusett); near the coast a regular local winter resident in small numbers. April 13–May 30; summer; Aug. 21–Nov. 26; winter.

R. I.—Common migrant and less common winter resident. Sept. 7–May 10.

CONN.—Common migrant and uncommon winter resident. April 8–May 20; Sept. 20–Nov. 10; winter.

**Audubon's warbler.**

Coniferous woods; nests in trees.

MASS.—Accidental visitor: Cambridge, Nov. 15, 1876.

**Magnolia warbler; Black and yellow warbler; Spotted warbler.** *Sylvia magnolia* Wilson, Amer. ornith., 1811, vol. 3, p. 63, pl.
23, fig. 2. "Banks of the Little Miami near its junction with the Ohio"; and "not far from Fort Adams on the Mississippi."

*Dendroica maculosa* (Gmel.). Chapman, Warblers No. Amer., 1907, p. 121, pl. 11, fig. 1–3. Egg, Capen, 1886, pl. 4, figs. 12, 14.

Coniferous and mixed thickets near streams in summer, woodlands generally in migration; nests in low trees.

**Vt.**—Common migrant, less common local summer resident. May 14–fall.

**Mass.**—Common migrant and in northwestern counties a less common local summer resident. (May 4) May 7–30; summer; Aug. 25–Oct. 9. Eggs, June 15.

**Conn.**—Common migrant. May 9–June 1; Sept. 15–Oct. 1.

*Cerulean warbler.*

Chapman, Warblers No. Amer., 1907, p. 170, pl. 9, fig. 4–6.

High tree tops; nests in trees.

**Mass.**—Accidental visitor: Cohasset, 1874.

**R. I.**—Accidental visitor: Lonsdale, May 14, 1893; Pawtucket, May 22, 1879; Providence, May 22, 1878.

**Conn.**—Accidental visitor: Seymour, May 10, 1888; Stratford, April, 1841; Suffield, June 12, 1875.

**Chestnut-sided warbler.**

Chapman, Warblers No. Amer., 1907, p. 187, pl. 12, fig. 4–6. Egg, Capen, 1886, pl. 4, figs. 11, 12.

Brushy thickets, clearings, and sproutlands; nests in low bushes.

VT.—Common migrant and summer resident. Eggs, June 6.

352. *Dendroica striata* (Forster) Baird.

**Black-poll warbler; Autumnal warbler.**

Chapman, Warblers No. Amer., 1907, p. 196, pl. 2, fig. 1–3. Egg, Capen, 1886, pl. 4, figs. 7, 8.

Spruce and fir forests in summer, and tree growth generally in migrations; nests in low trees.

N. H.—Common migrant and from White Mts. north, a com-

Vt.—Common migrant, and on higher mountains an uncommon summer resident (Killington Peak, Mt. Mansfield, Stratton Mt.).

353. Dendroica blackburniae (Gmelin) Baird.

**Blackburnian warbler; Hemlock warbler.**

Chapman, Warblers No. Amer., 1907, p. 175, pl. 3, figs. 1, 2.

Egg, Capen, 1886, pl. 4, figs. 5, 6.

High coniferous and mixed woods, especially hemlock and white pine; nests in tree tops.

Me.—Rare migrant in southern counties, elsewhere an uncommon local summer resident. (May 4) May 6–Sept. 17. Eggs, June 5–15.

Vt.—Uncommon local summer resident. (May 2) May 7–summer.

Mass.—Rare migrant and summer resident in eastern, commoner in northwestern part. (May 2) May 6–30; summer; Sept. 7–23 (Oct. 10). Eggs, June 5–26.

Conn.—Common migrant and rare summer resident. May 5–27; summer; Sept. 15–Oct. 3 (Nov. 8, 1907, New Haven).
354. Dendroica castanea (Wilson) Baird.

**Bay-breasted warbler.**

Chapman, Warblers No. Amer., 1907, p. 192, pl. 12, fig. 1–3. Egg, Capen, 1886, pl. 4, figs. 9, 10.

Spruce and fir forests in summer, tree tops generally in migration; nests in trees.

ME.—Rare migrant and in northern part a rare summer resident. (May 8) May 14–Aug. Eggs, June 8–15.

VT.—Rare migrant.

Mass.—Usually rare, but sometimes common migrant. May 8–May 28 (June 19; July 2, Springfield); Aug. 23–Oct. 8.

CONN.—Migrant, irregularly rare or common. May 15–30; Sept. 30–Oct. 17.

355. Dendroica dominica (Linné) Baird.

**Yellow-throated warbler.**

Chapman, Warblers No. Amer., 1907, p. 180, pl. 13, figs. 1, 2.

"Jamaica, Dominica."

Tree growth bordering streams or bayous; nests in trees.

VT.—Recorded from Lunenburg, 1878.

Mass.—Accidental visitor: Dedham, Nov. 4, 1866; Springfield, May, 1892.

CONN.—Accidental visitor: Connecticut valley, "several"; New Haven.
356. *Dendroica virens* (Gmelin) Baird.

**Black-throated green warbler.**

Chapman, Warblers No. Amer., 1907, p. 157, pl. 14, fig. 1–3. Egg, Capen, 1886, pl. 3, fig. 15.

Forest trees, particularly white pines; nests in coniferous trees (once "on the ground," Brewster).

**Vt.**—Common migrant and summer resident. May 2–fall.

**Pine warbler; Pine-creeping warbler.**

Coniferous woods, especially pitch-pine groves; nests in trees.

**N. H.**—Uncommon local summer resident north to White Mts. April 6–Sept. 30.
PASSERES.

MNIOTILTIDAE.

VT. — Uncommon local summer resident in southern part. April 17–fall.

Mass. — Common migrant and summer resident; accidental in winter. (Mar. 29) April 1–Nov. 25 (winter). Eggs, May 8–June 16; July (2d brood).

Conn. — Common migrant and summer resident. April 14–Sept. 29.

358. Dendroica palmarum (Gmelin) Baird.

Palm warbler; Redpoll warbler.

Open tree or bushy growth, and edges of fields; nests on the ground.

N. H. — Uncommon fall migrant (a doubtful spring record, Manchester, May 9, 1900). Sept. 7–16.

VT. — Rare fall migrant.

Mass. — Rare fall migrant. Sept. 7–Oct. 28 (Dec. 6, 1902, Belmont).

R. I. — Rare fall migrant: Westerly, Sept. 21, 1896.

Conn. — Rare fall migrant; once recorded in winter (Jan. 1880, at New Haven). Sept. 19–Oct. 10 (Jan.).

359. Dendroica palmarum hypochrysea Ridgway.

Yellow palm warbler; Twitch-tail warbler; Yellow redpoll warbler.

Swamps, edges of woods, or open country; nests on or near the ground.

**N. H.**—Common spring and uncommon fall migrant. April 13–May 11; Sept. 16–Oct. 9.

**Vt.**—Uncommon migrant.

**Mass.**—Common spring and uncommon fall migrant; said to have wintered. (Mar. 28, 1908, Hyde Park; April 5) April 13–May 21; Sept. 5–Oct. 26.

**R. I.**—Common spring and uncommon fall migrant. April 5–22; Sept. 15–26.

**Conn.**—Common spring and uncommon fall migrant. April 9–May 5; Oct. 18–Nov. 4.

360. **Dendroica discolor** (Vieillot) Baird.

**Prairie warbler.**

Dry bush-grown fields and sproutlands; nests in bushes.

**N. H.**—Rare local summer resident in southern part (Hollis, Manchester).

**Vt.**—Accidental visitor: Uxbridge, Dec. 4, 1884.

AVES.

PASSERES.

MNIOTILTIDAE.

361. Seiurus aurocapillus (Linne) Swainson.

Oven-bird; Golden-crowned thrush.

Chapman, Handb. birds east. No. Amer., 1895, p. 365; Allen, Auk, 1894, vol. 11, pl. 2. Egg, Capen, 1886, pl. 5, figs. 4, 5.

Forests and groves; nests on the ground.

Vt.—Common migrant and summer resident. May 5–fall. Eggs, June 7.

362. Seiurus noveboracensis (Gmelin) Bonaparte.

Water-thrush; New York Accentor; Northern water-thrush; Wagtail warbler; Water wagtail.

FAUNA OF NEW ENGLAND.

PASSERES.  

MNIOTILTIDAE.

Swampy woods and borders of streams; nests on the ground or among tree roots.

Vt.—Common migrant, and mainly in northern part, a less common summer resident.

R. I.—Common migrant and rare local summer resident (Washington Co.). May 7–(summer); Aug. 12–Sept. 15. Eggs, May 19, 20.

363. Seiurus noveboracensis notabilis (Ridgway) Ridgway.

Grinnell’s water-thrush.

Vicinity of streams; nests on or near the ground.

Conn.—Rare migrant: East Haven, Sept. 21, 1904; Hamden, Sept. 7, 1904; Orange, May 20, 1905 (Bishop).

364. Seiurus motacilla (Vieillot) Bonaparte.

Louisiana water-thrush; Large-billed water-thrush.

WOODED borders of streams; nests on the ground or among tree roots.

ME.—Accidental visitor: Norway, May, 1865 (nee Waterville, 1865).

N. H.—Doubtfully recorded (Dublin).

VT.—Doubtfully recorded (Brattleboro, "fall").

Kentucky warbler.

Undergrowth of swampy woods; nests on or near the ground.

VT.—Accidental visitor: Lunenburg, May 30, 1905; also a former doubtful record (Taftsville, May 19, 1884).

Mass.—Accidental visitor: Wellesley, May 14, 1907; also doubtfully recorded from Lynn.

R. I.—Accidental visitor: Newport, spring of 1890.

Conn.—Rare summer visitor (Lyme; Suffield, Aug. 16, 1876; West Stratford, May 30, 1888) and summer resident (Greenwich, with nestlings, July 10, 1892).

Connecticut warbler.

PASSERES.

MNIOTILTIIDAE.

Tamarack swamps, and in migration, damp woods and thickets; nests on the ground.

ME.—Rare fall migrant. Sept. 5–20 (née Aug. 30, 1878, Cape Elizabeth).

N. H.—Rare fall migrant. Sept. 6–Oct. 11.

Vt.—Rare (? spring and) fall migrant. (? Brattleboro, May; ? Rutland, April 24, 1879); Sept. 20–30.

Mass.—Uncommon fall migrant (? accidental in spring). (May 1890, West Newton; fide Maynard); Sept. 7–Oct. 9.

Conn.—Accidental spring and uncommon fall migrant. (Spring, Saybrook; nee New Haven); Sept. 15–Oct. 10.

Mourning warbler.

Syl\textit{via philadelphia} Wils., \textit{Amer. ornith.}, 1810, vol. 2, p. 101, pl. 14, fig. 6. "\textit{Within a few miles of Philadelphia.}"

Tangles of bushes, vines, and briers; nests on or near the ground.

Vt.—Uncommon migrant and summer resident south to Londonderry. May 20–Sept. 20.

Mass.—Rare migrant and in Berkshire Co., a rare summer resident. (May 14) May 21–June 13; summer; Sept. 12–30.

R. I.—Rare migrant. May 21–June 5; Sept. 4.

Conn.—Rare migrant. May 12–27; fall.
368. Geothlypis trichas (Linné) Cabanis.

Maryland yellowthroat; Black-masked ground warbler; Yellowthroat.

_Geothlypis trichas brachidactyla_ (Swains.). Chapman, Warblers No. Amer., 1907, p. 251, pl. 20, fig. 3–5. Egg, Capen, 1886, pl. 5, fig. 9–11.

Weed patches and thickets near water; nests on or near the ground.

VT.— Common migrant and summer resident. Eggs, June 2.

369. Icteria virens (Linné) Baird.

-Yellow-breasted chat; Ghost-bird (Indian); Yellow chat.

Audubon, Birds of Amer., 1842, vol. 4, p. 162, pl. 244. Egg, Capen, 1886, pl. 5, figs. 14, 15.

Bushy thickets; nests in low bushes.

ME.— Accidental visitor (five instances). June 6–Oct. 5.
MNIOTILTIIDAE.

N. H.—Doubtfully recorded.
Vt.—Very rare summer resident in extreme south: Pownall, June 16, 1896.

370. Wilsonia citrina (Boddart) A. O. U. comm.

Hooded warbler.

Wilsonia mitrata (Gmel.). Chapman, Warblers No. Amer., 1907, p. 269, pl. 21, fig. 1–3. Egg, Capen, 1886, pl. 6, fig. 1.
Undergrowth of woods; nests in bushes.

Me.—Accidental visitor: Falmouth, Sept. 10, 1904.
Vt.—Doubtfully recorded.
Mass.—Rare visitor; possibly breeding in southwestern valleys. May 8–Oct. 15 (June 25, 1879, Brookline; June 25, 1888, Provincetown).
R. I.—Accidental visitor: Kingston.

371. Wilsonia pusilla (Wilson) Bonaparte.

Wilson’s warbler; Black-capped flycatching warbler; Wilson’s blackcap.

Chapman, Warblers No. Amer., 1907, p. 274, pl. 22, figs. 1, 2. Egg, Capen, 1886, pl. 6, fig. 2.
MNIOTILTIDAE.

*Muscicapa pusilla* Wils., Amer. ornith., 1811, vol. 3, p. 103, pl. 26, fig. 4. "SOUTHERN STATES, AND...NEW JERSEY AND DELAWARE."

Bushy growth near streams or in swamps; nests on the ground.

Me.—Uncommon migrant and summer resident (south to Pittsfield). May 7–June 5; summer; Aug. 18–Sept. 11 (Oct.). Eggs, May 31–June 19.

N. H.—Uncommon migrant and north of White Mts. a rare local summer resident (Lancaster). May 9–29; (summer); Aug. 15–Oct. 3. Eggs, June 6.

Vt.—Uncommon migrant; (?)summer). May 17; Aug. 24.

Mass.—Uncommon migrant. May 7–30 (June 1); Aug. 23–Sept. 27 (Nov. 20, 1898, Belmont).

Conn.—Uncommon migrant. May 10–25; Sept. 27.

372. **Wilsonia canadensis** (Linné) Coues.

**Canadian warbler; Canada flycatcher.**

Chapman, Warblers No. Amer., 1907, p. 280, pl. 22, fig. 3–5. Egg, Capen, 1886, pl. 6, figs. 3, 4.

Wet woods or thickets along streams; nests on or near the ground.

Vt.—Common migrant and less common local summer resident. May 15–fall.

R. I.—Common migrant and uncommon local summer resident. May 11–fall.

373. _Setophaga ruticilla_ (Linné) Swainson.

**American redstart.**

Chapman, Warblers No. Amer., 1907, p. 287, pl. 23, fig. 1–3. Egg, Capen, 1886, pl. 6, fig. 5.

Orchards, shade and forest trees; nests in trees.

Vt.—Common migrant and summer resident. May 8–fall.

**MOTACILLIDAE.**

374. _Anthus rubescens_ (Tunstall) A. O. U. comm.

**American pipit; Brown lark; Titlark; Wagtail.**

_Alauda rubescens_ Tunstall, Ornith. Britannica, 1771, p. 2. No locality; based on Red lark from London and North America (fide Oberholser).

_Anthus piciens_ Audubon, Ornith. biogr., 1832, vol. 1, pl. 80.
AVES.

PASSERES.

MOTACILLIDAE.

Barren grounds, fields and sea coasts; nests on the ground.

ME.— Rare spring and common fall migrant. May 2–18 (June 1, 1907, Lubec); Sept. 13–Oct. 25 (Dec. 13, 1901, Seguin Id.).

N. H.— Rare spring and common fall migrant. April 3–May 10; Sept. 15–Nov.

VT.— Rare spring and uncommon fall migrant.

Mass.— Uncommon spring and common fall migrant; accidental in winter (Boston Harbor, Feb. 25, 1882; Newburyport, Jan. 4, 1878). April 18–May 20 (June 8); (Aug. 29, 1888, Monomoy Id.) Sept. 10–Nov. 24 (winter).

R. I.— Rare spring and common fall migrant. Mar. 29–May 15; Sept. 16–Nov. 28.

Conn.— Rare spring and common fall migrant. April–May; Sept. 15–Nov. 14 (Dec. 25, 1908, South Norwalk).

MIMIDAE.

375. Mimus polyglottos (Linné) Bonaparte.

Mockingbird.

Chapman, Handb. birds east. No. Amer., 1895, p. 377; Birdlife, 1898, pl. 66. Egg, Capen, 1886, pl. 1, fig. 8–10.

Thickets and dense tree clumps; nests in bushes or trees.

ME.— Occasional visitor at all seasons or escape; said to have bred at Leeds about 1885.

N. H.— Accidental visitor or escape: Hampton; Milford.

VT.— Accidental visitor or escape; pair nested at Lunenburg, 1884.

R. I.— Occasional visitor at all seasons (or escape).
PASSERES.
MIMIDAE.
OSCINES.

Conn.—Rare summer resident (more frequent formerly); occasional visitor (or escape) at all seasons. Eggs, June 20 (Jewett City).

**Catbird; Pussy.**

Bushy thickets near water; nests in bushes or among vines.

ME.—Common summer resident, mainly of southern counties. May 17—Oct. 4. Eggs, June 2—17; July (2d brood).

Vt.—Common summer resident.

Conn.—Common summer resident. May 3—Nov. 4. Eggs, May 17—23; July 26 (2d brood).

**Brown thrasher; Brown thrush; Mavis; Mocking thrush; Planting-bird; Song thrush; Thrasher.**

MIMIDAE.

Thickets and sproutlands; nests in bushes or rarely on the ground.

Vt.— Uncommon summer resident at lower elevations.
Conn.— Common summer resident. April 22–Oct. 2.

TROGLODYTIDAE.

378. Thryothorus ludovicianus (Latham) Bonaparte.

Carolina wren; Great Carolina wren; Mocking wren.

Dense undergrowth and tangles; nests in cavities of trees or crevices of buildings.

ME.— Accidental visitor (Falmouth, Oct. 3, 1908; Waterville) and accidental summer resident (Norway Lake, eggs, June, 1883, fide Knight).
N. H.— Accidental visitor: Alstead, July 6, 1903; Rye Beach, Aug. 7, 1880; Webster, about 1900.
Vt.— Doubtfully recorded.
Mass.— Occasional visitor at all seasons and very rare summer resident (Naushon Id., July, 1901).
PASSERES.

TROGLODYTIDAE.

R. I.—Occasional visitor in summer and fall, and rare summer resident (at Middletown). April 9–Nov. 28. Eggs, April 15.

Conn.—Occasional visitor at all seasons and rare resident (near Bridgeport, Chester, South Norwalk). Eggs, July 16.

379. Thryomanes bewickii (Audubon) Ridgway.

Bewick’s wren.

Brush piles, orchards, and vicinity of outbuildings; nests in cavities of trees or buildings.

Me.—Doubtfully recorded (Seguin Id., Oct. 6).

N. H.—Accidental visitor: Alton, April 25, 1890.

380. Troglodytes aedon Vieillot.

House wren.

Brush piles, orchards, and vicinity of outbuildings; nests in hollow limbs, bird boxes, or any convenient crevice.

Me.—Uncommon local summer resident (to Caribou). May 8–Aug.

Vt.—Uncommon summer resident. May 11–fall.

381. **Nannus hiemalis** (Vieillot) A. O. U. comm.

**Winter wren.**

Damp woods or thickets near water, and in migration, tangles, brush heaps, and brier patches; nests in crevices of upturned roots.

**ME.**—Common migrant and in northern part a common summer resident; very rare winter resident (Bangor). (April 1) April 9–Nov. 17 (winter). Eggs, May 20–June 3; Aug. 8 (2d brood).

**N. H.**—Common migrant and less common summer resident, local south of White Mts.; rare winter resident in southeast part. April 5–Nov. 15 (winter). Eggs, May 20–July 23 (2d brood).

**Vt.**—Uncommon migrant, less common summer resident in mountainous parts south to Londonderry; may winter. April 7–Nov. 24 (Dec. 30, Jan. 1). Eggs, June 4.

**Mass.**—Uncommon migrant, less common summer resident (Berkshire Co., and locally east, Lynn, Winchendon); rare winter resident near coast. April 4–29; summer; Sept. 2–Nov. 25; winter.

**R. I.**—Uncommon migrant and rare winter resident; rare local summer resident (Washington Co., nest with young, May 24, 1908). April; (summer); Sept.–Nov. 28; winter.

**Conn.**—Uncommon migrant and less common winter resident. Oct. 2–April.

382. **Cistothorus stellaris** (Lichtenstein) Cabanis.

**Short-billed marsh wren.**

FAUNA OF NEW ENGLAND.

PASSERES.

TROGLODYTIDAE.

Wet grassy meadows; nest usually built among tall grass stems near the ground.

Me.—Rare local summer resident (Bangor, Glenburn). May 4–Oct. 10.

N. H.—Rare local summer resident in southern part; rare visitor in White Mt. region.

R. I.—Rare local summer resident (Newport). Eggs, June 6.

Conn.—Rare local summer resident. Spring–Sept. 17.

Long-billed marsh wren.

*Certhia palustris* Wils., Amer. ornith., 1810, vol. 2, p. 58, pl. 12, fig. 4. "Pennsylvania...along the tide water of our rivers."

Cat-tail swamps; nests among the flags.

Vt.—Rare visitor: Brattleboro, May, 1902; Middlebury; Rutland, May 27, 1907.

Mass.—Common local summer resident in western valleys and coastwise (Essex Co.); rare winter resident (Fresh Pond). (May 2) May 15–Nov. 30 (winter). Eggs, June 5–29 (Aug. 1).

Conn.—Common summer and rare winter resident. May 5–(winter). Eggs, June 7–July 28

**Brown creeper; Tree creeper.**

*Certhia americana* Bonap., Geogr. and comparative list birds Europe and No. Amer., 1838, p. 11. "Western and northern parts" of No. America.

Cool mixed or coniferous woods in summer, tree growth generally at other seasons; nests behind loose flake of bark.

ME.—Common migrant, less common summer and winter resident. Eggs, May 31–June 23.

N. H.—Resident, breeding locally south of White Mts., and more commonly north. Eggs, May.

Vt.—Common migrant and winter resident; uncommon local summer resident.

Mass.—Common migrant and winter resident; less common summer resident in western part, but rare and local in eastern swamps (to Taunton). Sept. 12–May 8; summer. Eggs, May 6–23.

Conn.—Common migrant and winter resident; rare summer resident. Late Sept.–late April (summer).

**White-breasted nuthatch; Sapsucker.**

Orchards, shade and forest trees; nests in holes in trees or stumps.
Red-breasted nuthatch; Canada nuthatch; Red-bellied nuthatch.

Coniferous woods, or, on migrations, tree growth generally; nests in holes excavated in dead trees.

Me.—Common resident south to Cape Elizabeth; elsewhere a periodically common winter resident. Eggs, May 6–June 2 (early July).

N. H.—Common resident from White Mts. north, elsewhere a rare summer and irregular winter resident. Eggs, May 20.

Vt.—Uncommon winter visitor and local summer resident. Eggs, May 5–30.

Mass.—Irregular fall and winter visitor; in western part at higher levels an uncommon, and elsewhere a rare and irregular summer resident. Aug. 15–May 20; summer. Eggs, May 18–June 10.

R. I.—Uncommon and irregular fall and winter visitor. Oct. 5–winter.

Conn.—Uncommon and irregular fall and winter visitor. (Aug. 28) Sept. 24–April 19.
PASSERES.

PARIDAE.

387. **Baeolophus bicolor** (Linné) Cabanis.

**Tufted titmouse.**

Woodlands generally; nests in holes of trees and stumps.

Me.—Accidental visitor: near Orono.

N. H., Vt.—Doubtfully recorded.

Conn.—Rare visitor: near Hartford; Lyme, Feb. 27, 1872, Jan. 1874; New Haven (Linsley).

388. **Penthestes atricapillus** (Linné) Ridgway.

**Chickadee; Black-capped chickadee or titmouse.**

Egg, Capen, 1886, pl. 2, figs. 4, 5.

Tree growth generally; nests near water in low dead stumps.

N. H.—Common resident, breeding below 3000 ft.

Vt.—Common resident. Eggs, May 10.

Mass.—Common winter and less common summer resident.

Eggs, May 4–June 25.

R. I.—Common winter and less common summer resident.

Eggs, May 9–18.

389. **Penthestes hudsonicus** (Forster) Ridgway.

**Hudsonian chickadee.**

PASSERES.

PARIDAE.

Spruce and fir forests; nests in holes in low trees or stumps.

ME.—Rare resident in northern and eastern counties; elsewhere an uncommon or rare winter visitor.

N. H.—Uncommon resident mainly above 3000 ft. on White Mts., north; elsewhere a rare winter visitor.

VT.—Uncommon resident in northern part and on higher mountains (Mt. Stratton, Sutton); elsewhere a rare winter visitor.

Mass.—Rare late fall and winter visitor; once in Plymouth Co., June 5, 1896. Oct. 18–April 5 (June 5).

R. I.—Accidental late fall visitor: Smithfield, Nov. 1, 1880.

Conn.—Accidental late fall visitor: New Haven, Nov. 13, 1875.

SYLVIIDAE.

390. Regulus satrapa Lichtenstein.

Golden-crowned kinglet; Golden-crested wren.

Spruce and fir forests in summer, tree growth generally at other times; nests in conifers.

ME.—Common migrant and less common winter resident; common summer resident in northern part. Eggs, June 15–24.

N. H.—Common migrant, less common winter resident; common summer resident from White Mts. north, local to the south. Eggs, May 24.

VT.—Common migrant and winter resident; less common local summer resident. Sept. 18–May 7; summer.

Mass.—Common migrant and winter resident; uncommon summer resident in western part but rare and local in eastern (Lynn, Plymouth Co., Winchendon). Sept.–April; summer. Eggs, May–June 29.

AVES.

PASSERES.

SYLVIIDAE.

Ruby-crowned kinglet; Ruby-crested wren.

Spruce and fir forests, and in migrations, tree growth generally; nests in conifers.

Me.—Common migrant and probably a rare summer resident in northern part (Ft. Kent, with young; near Bangor, nest without eggs). April 14–May 16 (May 23); (summer); Sept. 25–Oct. 22.

Vt.—Common migrant. April 11; fall.

Mass.—Common migrant; casual in winter (at Highland Light, Jan. 15, 1892; Fresh Pond, Cambridge, Dec. 23, 1899). April 5–May 13; Sept. 23–Nov. 20 (winter).

Conn.—Common migrant. April 11–(May 16); Oct. 13–Nov. 24.

392. Polioptila caerulea (Linné) Selater.

Blue-gray gnatcatcher.

Culicivora caerulea Lath. Audubon, Birds of Amer., 1840, vol. 1, p. 244, pl. 70. Egg, Capen, 1886, pl. 2, fig. 3.

Woodlands; nests in trees.

Me.—Accidental visitor: Cape Elizabeth, Aug. 29, 1880; April 18, 1896.

N. H., Vt.—Doubtfully recorded.

Mass.—Accidental visitor (? may once have bred near Taunton). Aug. 27–Dec. 18.
PASSERES.  

SYLVIIDAE.  

Conn.—Rare summer visitor (five instances, *née* Wauregan).  
April 6–Sept. 1.

TURDIDAE.  

393.  *Hylocichla mustelina* (Gmelin) Ridgway.  

*Wood thrush; Mountain thrush* (Vt.); *Swamp angel; Swamp thrush; Wood robin.*  

“*In Noveboraco.*”  Seebohm and Sharpe, Monogr. of Turdidae, 1898, pt. 4, pl. 43.  
Egg, Capen, 1886, pl. 1, fig. 2.  

Bushy growth near edges of moist shady woods; nests in bushes or trees.  

ME.—Rare summer resident in southwestern part (to Franklin Co.).  Spring–Sept. 6.  

N. H.—Rare summer resident north to White Mt. valleys.  
May 15–Sept.  

Vt.—Uncommon summer resident at lower elevations (to Mt. Mansfield and Willoughby Lake).  May 10–fall.  

Mass.—Common summer resident, mainly at low elevations.  

Conn.—Common summer resident.  May 1–Oct.  

*Wilson’s thrush; Cheeury; Nightingale; Swamp robin; Tawny thrush; Veery.*  

1, p. 182. "to the north of Pennsylvania." Scebohm and Sharpe, Monogr. Turdidae, 1898, pt. 4, pl. 44. Egg, Capen, 1886, pl. 1, fig. 7.

Swamps and undergrowth along streams; nests on or near the ground, rarely in trees.

Me.—Common summer resident. (April 17, 26) May 1–Sept. 20 (Oct. 1). Eggs, June 1–18 (July 1).

Conn.—Common summer resident. May 1–Sept. 1.

Willow thrush; Newfoundland thrush.

Swamps and undergrowth bordering streams; nests on or near the ground.

Mass.—Rare migrant: Lanesboro, Sept. 27, 1900; Lowell (these are the race "fuliginosa" Howe, considered by the A. O. U. committee inseparable from salicicola and by Ridgway as synonymous with H. fuscescens).

R. I.—Rare migrant: Bristol, Sept. 24, 1899; Newport, Sept. 25, 1885.

Conn.—Rare migrant. May 5, 6, 14, 16; Sept. 23 (= salicicola, Bishop).

Gray-cheeked thrush; Alice’s thrush; Arctic thrush.

Dense fir thickets in summer, moist shaded spots on migration; nests in low trees.

N. H.—Rare migrant: Dublin, Oct. 2, 1899.
Vt.—Rare migrant. May 18.
Mass.—Uncommon migrant. (May 13) May 17—June 3 (June 18); Sept. 10—Oct. 9.
Conn.—Uncommon migrant.

Bicknell’s thrush.

Fir and spruce thickets in summer, moist shady spots on migration; nests in low trees.

Me.—Common local summer resident on higher mountain tops (Mt. Abraham, Ktaadn, etc.); Maine breeding birds may be true *aliciae* (Knight). May—Sept. 20.
Vt.—Uncommon summer resident on higher mountains: Jay Peak, Mt. Annanance, Mt. Killington, Mt. Mansfield, Pico Peak, etc. May—Sept. Eggs, June 22.
Mass.—Uncommon migrant, and on summit of Mt. Greylock
AVES.

PASSERES.

TURDIDAE.

(3505 ft.) a rare summer resident. (May 2)–May 30; summer; Sept. 18–Oct. 25.

Conn.—Uncommon migrant.

398. Hylocichla ustulata Swainsonii (Cabanis) Ridgway.

Olive-backed thrush; Flycatching thrush; Mosquito thrush; Swainson’s thrush; Swamp robin.

Turdus swainsonii Cab., Fauna Peruana, 1845–46, p. 188. “Peru”; specimen described from New Jersey (= type locality). Seebohm and Sharpe, Monogr. Turdidae, 1898, pt. 4, pl. 45, fig. 3.

Cool shady thickets; nests in low trees or bushes.

Vt.—Common migrant and less common summer resident mainly in northern part and at higher levels south to Londonderry.

Mass.—Common migrant and in higher parts of Berkshire Co., an uncommon summer resident. May 3–June 7; summer; Sept. 9–Oct. 21.

399. Hylocichla guttata pallasii (Cabanis) Faxon and Hoffmann.

Hermit thrush; Ground swamp robin (Me.); Rufous-tailed thrush; Solitary thrush; Swamp robin or thrush; Woodchuck.

Turdus pallasii Cab., Arch. f. naturgesch., 1847, vol. 13, pt. 1,
p. 205. Locality not given; based on Cab., in Tschudi's Fauna Peruana. Seebohm and Sharpe, Monogr. Turdidae, 1898, pt. 4, pl. 46, fig. 2.

Undergrowth of dry woods; nests on the ground.

ME.—Common migrant and summer resident; may winter rarely. (April 5) April 13–Nov. 26 (Dec. 25, 1904, Cape Elizabeth). Eggs, (May 1) May 17–June 10; July 14–Aug. 10 (2d brood).

VT.—Common migrant and summer resident. (April 4) April 10–fall.

MASS.—Common migrant, less common summer resident in western, local in eastern part (Cape Cod, Martha's Vineyard); rare winter resident near coast. (April 1) April 8–Nov. 30 (winter). Eggs, June 14.

R. I.—Common migrant and rare winter resident; rare local summer resident (Kent Co.). April 10–(summer); Oct.–Nov. 20 (Dec. 3, winter). Eggs, June 6.

CONN.—Common migrant, uncommon local summer resident (Bear Mt., Hartford Co., Norfolk, Salisbury); rare winter resident. (April 3) April 12–May; summer; Oct.–Nov. 20 (winter).

400. _Planesticus migratorius_ (Linné) Coues.

American robin.

Ubiquitous, but avoiding woods in breeding season; nests in trees, on ledges of buildings, or on the ground.

ME., N. H., VT.—Common migrant and summer resident; rare winter resident mainly in southern part. Mar. 3–Nov.; win-
AVES. 221

PASSERES. TURDIDAE. OSCINES.

Mass.—Common migrant and summer resident; less common winter resident chiefly near coast. Mar. 8–Nov. 23; winter. Eggs, April 25–July 25 (2d brood) (! Oct. 29, 1903, Brandon).

R. I.—Common migrant, less common summer and winter resident. Mar. 11–Nov. 28; winter. Eggs, April 17–June 7; July.

Conn.—Common migrant and summer resident; less common winter resident. Feb. 18–Nov.; winter. Eggs, April 27–July 2.

401. Ixoreus naevius (Gmelin) Richmond.

Varied thrush.

Evergreen forests; nests in trees.

402. Sialia sialis (Linne) Haldeman.

Bluebird.

Orchards and open country; nests in hollow limbs or in bird houses.

PASSERES. OSCINES.

TURIDAE.

Vt.—Common migrant and summer resident. (Feb. 23) Mar. 17–Oct. 16.

Mass.—Common migrant, less common summer resident; near coast, a rare winter resident (Melrose Highlands, Roxbury, Wellesley, Cape Cod). (Feb. 23) Mar. 1–Nov. 20 (Dec. 10, 29); winter. Eggs, April 15–June 5.

Conn.—Common migrant and summer resident; uncommon winter resident. Mar. 5–Nov. 13; winter. Eggs, April 15–June 14.

Species Introduced or Erroneously Accredited.

COLYNUS CRISTATUS Linné. Crested grebe.—An Old World species erroneously recorded by early writers.

AETHIA CRISTATELLA (Pallas). Crested auklet.—Doubtfully recorded from Chatham, Mass., winter of 1884–85.

CEPHEUS MANDTI (Lichtenstein). Mandt's guillemot.—The supposed Maine specimen proves to be C. grylle, and the Massachusetts record is too doubtful for acceptance.

PUFFINUS PUFFINUS (Brünnich). Manx shearwater.

PUFFINUS "CINEREUS" (= KUHLI Gould). Mediterranean shearwater.—European species listed from New England by several of the older writers but probably in error for P. gravis or P. borealis.

THALASSIDROMA PELAGICA (Linne). Stormy petrel.—Given on authority of Boardman as a rare summer visitor "off the coast of Eastern Maine," but the record is not allowed by Knight.

PELAGODROMA MARINA (Latham). White-faced petrel.—A specimen taken in lat. 40° 34' 18" N., long. 66° 09' W., Sept. 2, 1885, was included in Dr. J. A. Allen's list of Massachusetts birds (1886), but the locality is outside the limits covered by the present catalogue.

PHALACROCORAX GRACULUS (Linne). Green cormorant.—This European species is accredited to Massachusetts by W. B. O. Peabody, who doubtless confused it with the American P. auritus.
Mergellus albellus (Linné). Smew.—Accredited by Samuels to Massachusetts, but apparently without good reason.

Chenalopex aegyptiacus (Linné) Stephens.

**Egyptian goose.**

Rivers and marshes; nests on the ground.

Mass.—The several instances of capture may relate to either accidental visitors or escapes.

Ardea occidentalis Audubon. Great white heron.—Recorded from Massachusetts in error for Herodias egretta.

Scolopax rusticola Linné. European woodcock.—Doubtful reference to this species at Newport, R. I.; ? Maine.

Totanus nebularius (Gunnerus). Greenshank.—This Old World species was accredited to Connecticut by Linsley who states that a specimen was killed at Stratford in fall of 1842.

Oreortyx pictus (Douglas) Baird.

**Mountain partridge; Plumed partridge.**

Mass—Introduced unsuccessfully about 1890.

Lophortyx californicus (Shaw) Bonaparte.

**California partridge or quail.**

Tetrao californicus Shaw, Naturalist’s miscellany, 1797 (?), vol. 9, pl. 345 and text. “California.”

Mass.—Unsuccessfully introduced in Berkshire Co. about 1890.

Conn.—Introduced: Bridgeport, Dec. 1840.

Lophortyx gambelii Gambel.

**Gambel’s partridge.**

Bushy growth; nests on the ground.
Mass.—Unsuccessfully introduced in Berkshire and Bristol Cos. in 1893; Martha’s Vineyard in 1890; Winchendon in 1891.

Tetrao urogallus Linné.

Capercaillie; Muscovian black gamecock; Wood grouse.

Mountainous forests; nests on the ground.
Vt.—Introduced about 1897 at Middlebury, Rutland, and elsewhere, unsuccessfully.

Tympanuchus americanus (Reichenbach) Ridgway.

Prairie hen; Prairie chicken.

Grassy prairies; nests on the ground.
N. H.—Unsuccessfully introduced at Blue Mt. Park about 1893.
Mass.—Unsuccessfully introduced: Barnstable and Berkshire Cos. in the '80's; between Concord and Belmont in 1884 or 1885; Martha’s Vineyard, 1902; Naushon Id.; Springfield, 1893.
R. I.—Unsuccessfully introduced about 1897.

Pedioecetes phasianellus (Linné) Elliot.

Sharp tailed grouse.

Pedioecetes phasianellus (Linné). Elliot, Monogr. of Tetraoninae, 1865, pl. 15. Egg, Bendire, 1892, vol. 1, pl. 3, fig. 3–5.

Thickets and clearings; nests on the ground.
Vt.—Unsuccessfully introduced about 1897.
Mass.—Unsuccessfully introduced near Westport about 1892.
Pedioecetes phasianellus campestris Ridgway.

**Prairie sharp-tailed grouse.**

Woods and thickets; nests on the ground.

Mass.—Unsuccessfully introduced at Springfield, 1892.

**Coturnix coturnix** (Linné) Lichtenstein.

**European quail; Migratory quail.**

Meadows and fields; nests on the ground.

ME.—Introduced unsuccessfully in 1880; 2600 liberated, but failed to establish themselves. Nest at Falmouth, June.

VT.—Unsuccessfully introduced at Rutland, June, 1877.

Mass.—Unsuccessfully introduced at various places (No. Falmouth, Springfield, Wareham) between 1870 and 1890.

Conn.—Unsuccessfully introduced: Lakeville, 1878.

**Perdix perdix** (Linné).

**European partridge; Hungarian partridge; Partridge.**

Open country and thickets; nests on the ground.

Conn.—Introduced in 1908.

**Phasianus colchicus** Linné.

**English pheasant; Pheasant.**

Bushy woods; nests on the ground, rarely in trees.
N. H.—Introduced from England at Wolfboro in 18th century.
Mass.—Unsuccessfully introduced in Berkshire Co.

**Phasianus torquatus** Gmelin.

*Ring-necked pheasant; Denny pheasant; Ring pheasant.*

Thickets; nests on the ground.
Vt.—Introduced successfully at Shelburne.
Mass.—Introduced at Winchester and elsewhere, since 1894, and now well established at many places, mainly in eastern part.
Conn.—Successfully introduced (Fisher's Id.).

**Columba domestica** Gmelin.

*Rock dove; Domestic pigeon; Dove; Pigeon.*

Sea cliffs, nesting in crevices of rocks; now domesticated about buildings.
Me.–Conn.—Introduced under domestication but now common in a feral state in towns and cities.

**Buteo borealis harlani** (Audubon). *Harlan's hawk.* Accredited to Massachusetts by Peabody on Nuttall's authority, probably in error.

"**Buteo cooperi**" Cassin. *Cooper's hen-hawk; California hawk.* A record for Cambridge, Mass., is believed to have been based on a very light-colored example of *B. lineatus*.

**Surnia ulula** (Linné). *European hawk owl.*—Specimens of this and the American race are said to have been taken at Houlton, Me., in 1877, but probably all were *S. u. caparoch*.

**Dryobates villosus leucomelas** (Boddaert). *Northern hairy woodpecker.*—Under this name Chadbourne lists the Hairy woodpecker from Williamstown, Mass., probably in error for *D. villosus*. 
Sphyrapicus varius nuchalis Baird. **Red-naped sapsucker.**—The supposed New Hampshire and Massachusetts specimens prove to be *S. varius varius*.

Agyrtinia viridissima (Lesson). **Linne's hummingbird.**—The authenticity of the supposed Cambridge specimen is open to doubt.

Alauda arvensis Linné.

**Skylark; Laverock.**

Open country, fields and meadows; nests on the ground.

Mass.—Unsuccessfully introduced from Europe at Cambridge, prior to 1880.

**Munia oryzivora** (Linné). **Java sparrow.**—A specimen was taken at Belmont, Mass., Nov. 2, 1884, but this and others are doubtless escaped cage birds.

**Munia atricapilla** (Vieillot). **Rufous and black weaver finch.**—A specimen of this Indian species, (doubtless an escape), was captured near Brunswick, Maine, in March, 1879 (recorded as *Amadina rubronigra*).

Sturnella neglecta Audubon. **Western meadowlark.**—Doubtfully recorded from Taunton, Mass.

**Megaquiscalus major** (Vieillot). **Boat-tailed grackle.**—Formerly accredited to Maine, Massachusetts, and Connecticut but probably the Bronzed grackle was the species observed.

Serinus butyracea (Linné) Bonaparte.

**Yellow finch.**

Serinus flaviventris (Swains.). Sharpe, Cat. birds British Mus., 1888, vol. 12, p. 353.

A South African species.

Mass.—Accidental visitor or escape: South Scituate, Feb. 1879, with flock of Redpolls.

Serinus serinus (Linné) Sharpe.

**Serin finch.**

Open country, orchards and gardens; nests in trees.
Mass.—Probably escaped cagebird: Springfield, Nov. 1866.

Passer domesticus (Linné) Koch.

House sparrow; English sparrow; European house sparrow.

Villages and cities in vicinity of dwellings; nests in trees, vines, or any cavity.
Me.—Common resident; introduced at Portland in 1854 and 1858, at Lewiston in 1874, at Bangor about 1875.
N. H.—Resident, common about large cities, less common in White Mt. valleys.
Vt.—Common resident about towns and cities; introduced at St. Johnsbury between 1874 and 1876.
Mass.—Common resident about towns and cities; introduced at Boston in 1858 and 1868, Brookline, 1868, Charlestown, 1869, Cottage City about 1882, Somerville, 1871.
R. I.—Common resident; introduced at Peacedale in 1858, Providence in 1866 or before, Newport, 1874.
Conn.—Common resident; introduced at New Haven in 1867, Norwich and Meriden between 1865 and 1870, Portland, 1869.

Acanthis brewsterii (Ridgway).

Brewster's linnet.

Brewster, Mem. Nuttall ornith. club, 1906, no. 4, pl. 6.
Aegiothus (flavirostris var.) brewsterii Ridgw., Amer. nat., 1872, vol. 6, p. 433. "Waltham, Massachusetts."
Status uncertain; probably a hybrid between Acanthis linaria and Spinus pinus.
Mass.—Only known specimen taken at Waltham, Nov. 1, 1870.

Carduelis carduelis (Linné) Schäffer.

European goldfinch.

Carduelis elegans Steph. Dresser, Birds of Europe, 1871–81, vol. 3, pl. [166].

Open country, orchards, and deciduous woods; nests in trees.

Mass.—Introduced in eastern part, but not well established; bred near Worcester, July 11, 1890.

Conn.—Escape, or straggler from lots introduced in neighboring country: New Haven, May 9, 1892.

Rynchophanes macownii (Lawrence). McCown's longspur.—Doubtfully recorded for Massachusetts on the basis of a market specimen said to have been taken at Ipswich, Jan. 7, 1877.

Coturniculus bairdii (Audubon). Baird's sparrow.—The first known specimens of Passerculus princeps were recorded under this name.

Peucaea aestivalis bachmanii (Audubon). Bachman's finch.—Recorded from Berlin, Mass., in error for Ammodramus henslowii.

Passerina ciris (Linné) Vieillot.

Painted bunting; Nonpareil.

Thickets and hedges; nests in bushes or low trees.

Me.—"Escape," Portland, June 10, 1904.

Mass.—Four instances; believed to be escaped cape birds.

R. 1.—Accidental visitor or escape: Scituate, summer, 1882.

Paroaria cucullata (Latham). Crested cardinal.—A South American species, once taken at Newport, R. I., Sept., 1885, but doubtless an escaped cagebird.

Gubernatrix cristata (Vieillot).—A South American finch, of which a specimen supposed to be an escape, was taken at Providence, R. I., July 7, 1888.

Vireo atricapillus Woodhouse. Black-capped Vireo.—Very doubtfully recorded from Lanesboro, Mass.

Helinaia swainsonii (Audubon). Swainson's warbler.—Erroneously accredited to Massachusetts by Audubon.

Helminthophila lawrencei (Herrick) Ridgway.

Lawrence's warbler.

Probably a hybrid form between H. pinus and H. chrysoptera, which it resembles in habits.

Mass.—One recorded as seen at Dedham, May 27, 1908.

Helminthophila leucobronchialis (Brewster) Ridgway.

Brewster’s warbler; White throated warbler.

Probably a hybrid form between H. pinus and H. chrysoptera, which it resembles in habits.

Mass.—Rare summer resident in eastern part (Hudson, Lexington, Newtonville, Jamaica Plain). May 14–summer. Eggs, June 8–18.

Conn.—Rare summer resident. May 6–Aug. 8. Eggs, June 24.

Penthestes atricapillus septentrionalis (Harris). Long tailed chickadee. Erroneously recorded from Rhode Island; the specimen proves to be P. a. atricapillus.

Sylvia atricapilla (Linné) Scopoli.

European blackcap warbler; Blackcap.

Groves and orchards; nests in bushes.

Mass.—Unsuccessfully introduced at Cambridge prior to 1877.

Turdus pilaris Linné. Fieldfare.—A European species, once taken near Stamford, Conn., Mar. 1888, but this probably an escaped cagebird.

Planesticus merula (Linné). Blackbird.—A male, probably an escape, spent the writer of 1908-09 near the Boston public garden.

Saxicola oenanthe leucorhoa (Gmelin). Greenland wheatear.—The supposed Maine records in reality refer to birds taken across the line in New Brunswick.
